**STATE OF NEVADA
BOARD OF WILDLIFE COMMISSIONERS
LEGISLATIVE REVIEW OF ADOPTED REGULATIONS--NRS 233B.066
Informational Statement**

**LCB File No. – R057-13
CGR Number - 434**

MEMORANDUM

To: Legislative Counsel Bureau **Date:** December 9, 2013
From: Tony Wasley, Secretary, Board of Wildlife Commissioners
Subject: Informational statement relating to Commission General Regulation No. 434
(LCB File No. R057-13) - as required by Chapter 233B.066.

1. A clear and concise explanation of the need for the adopted regulation.

Inconsistencies existed between various wildlife management unit descriptions. These written descriptions provide a legal basis for the enforcement of unit specific harvest regulations. Word descriptions were edited to clarify unit and Area boundary descriptions and to make sure adjacent unit boundaries matched exactly.

2. Description of how public comment was solicited, a summary of public response, and an explanation of how other interested persons may obtain a copy of the summary.

Public comment was solicited through individual County Advisory Boards to Manage Wildlife and at the Nevada Board of Wildlife Commissioners public meeting. All meetings included posted agendas and support material was provided on the Nevada Department of Wildlife website. One public comment was received from a County Advisory Board to Manage Wildlife member in support of the regulation. For a summary of public comment, please contact Nevada Department of Wildlife at 775-688-1549.

3. The number of persons who:

- (a) Attended each hearing: 25 Workshop 29 Hearing**
- (b) Testified at each hearing: 1 Workshop 0 Hearing**
- (c) Submitted written comments: 0**

4. For each person identified in paragraphs (b) and (c) of number 3 above, the following information if provided to the agency conducting the hearing: (SEE ATTACHED PUBLIC COMMENT CARDS)

- (a) Name;**
- (b) Telephone number;**
- (c) Business address;**
- (d) Business telephone number;**

- (e) Electronic mail address; and
- (f) Name of entity or organization represented.

5. A description of how comment was solicited from affected businesses, a summary of their response and an explanation of how other interested persons may obtain a copy of the summary.

The regulation does not affect the operations of, or requirements to any business and no effect is anticipated on any business as a result of this change.

6. If the regulation was adopted without changing any part of the proposed regulation, a summary of the reasons for adopting the regulation without change.

The regulation was adopted without change as no public comment was received offering changes to this specific regulation.

7. The estimated economic effect of the regulation on the business which it is to regulate and on the public.

(a) Estimated economic effect on the businesses which they are to regulate.

This regulation does not regulate businesses. The immediate effect of the regulation will benefit the public by clarifying wildlife management area and unit descriptions so that any wildlife laws that pertain to them will be more clear and boundaries consistent to facilitate staying within the law. Long-term benefits are the same as short-term benefits but would also include any business opportunities that may occur in the future that utilize these boundaries to sell a product or service that relates to wildlife related activities that are managed according to these unit boundary descriptions. Having these descriptions in NAC make them more accessible to the public who may choose to use them as a business opportunity to sell a product or service related to wildlife management in these management areas and units to the public. No adverse effects are known to exist especially since the modifications did not significantly change any of the actual boundaries, rather as a beneficial effect, the boundaries were clarified and made consistent with adjacent boundaries to provide a legal basis for the enforcement of unit specific game harvest regulations and clarify them to the public.

(b) Estimated economic effect on the public which they are to regulate.

No economic effect is expected to occur on the public regulated by this regulation change because the changes merely sought to clarify boundary descriptions with current names of roads and locations and did not affect any fee related regulations that could result in an economic effect on the public. Because the regulations should be more clear to the public with inconsistencies in boundaries edited to facilitate clarity and consistency, it should actually reduce potential negative economic effects that a member of the public might incur if the boundaries were unclear or inconsistent and subsequently a citizen was charged with violating unit specific harvest regulations and had to incur the costs of trying to prove innocence or demonstrate inconsistencies in the unit-boundary regulation to the

court or be economically and personally inconvenienced by having their outing cut short, receiving citations and having equipment confiscated for harvesting in the wrong area.

8. The estimated cost to the agency for enforcement of the proposed regulation:

No additional cost is expected to occur for the agency to enforce this regulation.

9. A description of any regulations of other State or governmental agencies which the regulation overlaps or duplicates and a statement explaining why the duplication or overlap is necessary. If the regulation overlaps or duplicates a federal regulation, the name of the regulating federal agency.

This regulation does not overlap any other State or governmental agency regulations.

10. If the regulation includes provisions that are more stringent than a federal regulation that regulates the same activity, a summary of such provisions.

This regulation does not relate to any particular federal regulation.

11. If the regulation provides a new fee or increases an existing fee, the total annual amount the agency expects to collect and the manner in which the money will be used.

No fees are associated with this regulation.
