LCB File No. R022-17

EXPLANATION – Matter in *italics* is new; matter in brackets ~~omitted material~~ is material to be omitted.

AUTHORITY: §§1 and 6, NRS 701A.450; §§2-5, NRS 701A.390.

A REGULATION relating to energy; adopting provisions governing the use of money in the Renewable Energy Account in the State General Fund; revising provisions relating to the denial of certain applications for certain partial abatements of property taxes by the Director of the Office of Energy; revising provisions relating to eligibility for certain energy-related tax incentives; providing that the Director may, upon request, provide an extension of time to file the annual compliance report for certain persons who execute certain abatement agreements with the Office; and providing other matters properly relating thereto.

Legislative Counsel’s Digest:

Existing law creates the Renewable Energy Account in the State General Fund and requires the Director of the Office of Energy to administer the Account. Under existing law, not less than 75 percent of the money in the Account must be used to offset the cost of electricity to or the use of electricity by retail customers of certain public utilities and the Director is authorized to establish by regulation other uses of the money in the Account. (NRS 701A.450) **Sections 1 and 6** of this regulation provide that the Director will use money in the Account for purposes specifically approved by the Legislature and, if applicable, the State Board of Examiners to accomplish the initiatives and goals of the Office of Energy and the Governor and the intent of the laws of this State pertaining to renewable energy, energy efficiency and electric vehicles.

Existing law prohibits the Director of the Office of Energy from approving certain applications for a partial abatement of property taxes submitted by a facility for the generation of process heat from solar renewable energy or a wholesale facility for the generation of electricity from renewable energy unless the application is approved or deemed approved by the board of county commissioners of the county in which the facility will be located. Under existing law, a board of county commissioners is authorized to deny such an application only if the board of county commissioners determines that: (1) the projected cost of the services that the local government is required to provide to the facility will exceed the amount of tax revenue that the local government is projected to receive as a result of the abatement; or (2) the projected

financial benefits that will result to the county from the employment by the facility of the residents of this State and from capital investments by the facility in the county will not exceed the projected loss of tax revenue that will result from the abatement. (NRS 701A.365) **Section 2** of this regulation provides that the Director will deny such an application if the Director receives from each board of county commissioners of a county in which the applicant's facility is located reasonable evidence to support one of those determinations by the boards of county commissioners. **Section 3** of this regulation makes a conforming change to existing regulations to maintain provisions providing that the Director will set a date for a hearing on an application for a partial abatement of taxes: (1) upon receipt of written notice of the approval of an application from the board of county commissioners; or (2) if the application is deemed approved under existing law.

Under existing law, eligibility for certain energy-related tax incentives is based in part on the average wages paid to employees working in a facility or working on the construction of the facility. (NRS 701A.365) **Section 4** of this regulation revises certain requirements with respect to determining compliance with these wage requirements to reflect the way in which the Department of Employment, Training and Rehabilitation annually reports wage data for the State.

Existing regulations require certain persons who execute an agreement with the Director for a partial abatement of taxes to file with the Director an annual compliance report. (NAC 701A.620) **Section 5** of this regulation provides that the Director may, upon request, provide an extension of time to file the annual compliance report and that such an extension must not exceed 30 days.

Section 1. Chapter 701A of NAC is hereby amended by adding thereto a new section to read as follows:
