

**CORRECTED ADOPTED REGULATION OF THE
PUBLIC UTILITIES COMMISSION OF NEVADA**

LCB File No. R085-19

EXPLANATION – Matter in *italics* is new; matter in brackets ~~omitted material~~ is material to be omitted.

AUTHORITY: §1, NRS 703.025, 704.210, 704.7983 and 704.7985; §§2-13, NRS 703.025, 704.210 and 704.7983; §14, NRS 703.025, 704.210 and 704.7985.

A REGULATION relating to the prevention of natural disasters; prescribing requirements relating to natural disaster protection plans of certain electric utilities; requiring an electric utility to report certain information to the Public Utilities Commission of Nevada; authorizing an electric utility to create a regulatory asset or liability account for certain capital projects; prescribing requirements relating to the use of certain persons to perform tree trimming for an electric utility; and providing other matters properly relating thereto.

Legislative Counsel’s Digest:

Existing law requires an electric utility to, on or before June 1, 2020, and on or before June 1 of every third year thereafter, submit a natural disaster protection plan to the Public Utilities Commission of Nevada. A natural disaster protection plan is generally required to contain certain information, procedures and protocols relating to the efforts of the electric utility to prevent or respond to a fire or other natural disaster. (NRS 704.7983) **Sections 2-6** of this regulation define terms relating to natural disaster protection plans. **Section 7** of this regulation: (1) authorizes two or more commonly owned electric utilities that have an interconnected system for the transmission of electricity to submit a joint natural disaster protection plan; and (2) prescribes the date by which an electric utility is required to submit a natural disaster protection plan to the Commission. **Section 7** also prescribes the information that is required to be included in a natural disaster protection plan. Finally, **section 7** requires an electric utility to use prudent practices commonly used in the utility industry to prevent fires and maintain resiliency during a natural disaster.

Section 8 of this regulation authorizes an electric utility to request expedited treatment of an element of a natural disaster protection plan if the utility requires additional time to implement the element before the next fire season. **Section 8** additionally prescribes processes for: (1) the approval or modification of a natural disaster protection plan after submission; and (2) the amendment or modification of a natural disaster protection plan after its approval.

Existing law authorizes a rural electric cooperative to submit a natural disaster protection plan to the Commission for the purpose of obtaining advice and recommendations. (NRS 704.7983) **Section 9** of this regulation provides that the Commission will issue an advisory

opinion on a natural disaster protection plan submitted by a rural electric cooperative not later than 150 days after the date of submission.

Section 10 of this regulation authorizes an electric utility to file a progress report concerning its natural disaster protection plan. **Section 11** of this regulation requires an electric utility to report to the Commission certain information relating to fires and other natural disasters and public safety.

Existing law requires an electric utility to recover all prudent and reasonable expenditures to develop a natural disaster protection plan as a separate monthly rate charged to customers. (NRS 704.7983) **Section 12** of this regulation requires an electric utility to: (1) separately track and account for those expenditures in its books and records; and (2) annually submit to the Commission a request to recover the cost of those expenditures. **Section 13** of this regulation authorizes an electric utility to create a separate regulatory asset or liability account for a new capital project constructed or acquired by and owned by the electric utility pursuant to a natural disaster protection plan. If an electric utility maintains such an account, **section 13** requires the utility to obtain the approval of the Commission annually before obtaining recovery for the balance of the account accrued during the previous year.

Existing law prohibits a person from performing tree trimming related to line clearance in an easement or right-of-way dedicated or restricted for use by an electric utility unless the person: (1) is a qualified electrical worker; or (2) is not an employee of the electric utility, is approved by the Commission and works under the direction of an arborist certified by the International Society of Arboriculture. (NRS 704.7985) **Section 14** of this regulation prescribes the requirements for an application for approval by the Commission of a person who is not an employee of the electric utility. **Section 14** also requires an electric utility that utilizes such an approved person to perform tree trimming to maintain documentation of compliance with statutory requirements.

Section 1. Chapter 704 of NAC is hereby amended by adding thereto the provisions set forth as sections 2 to 14, inclusive, of this regulation.

Sec. 2. *As used in sections 2 to 14, inclusive, of this regulation, unless the context otherwise requires, the words and terms defined in sections 3 to 6, inclusive, of this regulation have the meanings ascribed to them in those sections.*

Sec. 3. *“Critical fire weather conditions” means a combination of weather and fuel conditions that are ideal for the ignition and rapid spread of wildfires.*

Sec. 4. *“Ignition event” means an event in which electric utility infrastructure starts a fire or scorches combustible material.*

Sec. 5. *“Natural disaster” means any natural catastrophe, including, without limitation, wind, wildfire, storm, high water, earthquake, avalanche, landslide, mudslide or heat wave.*

Sec. 6. *“Natural disaster protection plan” means a natural disaster protection plan submitted to the Commission pursuant to NRS 704.7983.*

Sec. 7. 1. *An electric utility shall, on or before March 1, 2020, and on or before March 1 of every third year thereafter, submit a natural disaster protection plan to the Commission. Two or more electric utilities that are affiliated through common ownership and that have an interconnected system for the transmission of electricity may submit a joint natural disaster protection plan. A natural disaster protection plan may be an amended version of a previous plan.*

2. *An electric utility shall include in its natural disaster protection plan all of the following information:*

(a) *A description of a risk-based approach used by the electric utility to identify areas within the service territory of the electric utility that are prone to different types of natural disasters and an identification of potential threats in the foreseeable future, including, without limitation, an identification of areas within the service territory of the electric utility that are subject to a heightened threat of a fire or other natural disaster.*

(b) *A description of the preventive strategies and programs, including, without limitation, operational practices, inspections and corrections, and system hardening that the electric utility will adopt to minimize the risk of its electric lines and equipment causing catastrophic wildfires. In determining which preventive strategies and programs to include in the description required by this paragraph, the electric utility shall consider dynamic climate change and other natural disaster risks.*

(c) A description of the metrics that the electric utility plans to use to evaluate the performance of the natural disaster protection plan and the assumptions underlying the use of those metrics.

(d) The threshold criteria for the de-energization of portions of the distribution and transmission system of the electric utility due to a natural disaster that considers the associated impacts on public safety.

(e) The protocols that the electric utility plans to use:

(1) For disabling reclosers and de-energizing portions of the distribution and transmission system of the electric utility that considers the associated impacts on public safety; and

(2) To mitigate the public safety impacts of the protocols described in subparagraph (1), including, without limitation, impacts on critical first responders and on health and communication infrastructure.

(f) A description of the procedures the electric utility intends to use to restore its distribution and transmission systems in the event of the de-energization of those systems or a portion of those systems.

(g) A communication plan related to public safety outage management, which includes, without limitation, communication plans specific to customers, stakeholders and communication infrastructure providers. Before filing a natural disaster protection plan, each electric utility shall meet with communication infrastructure providers in an effort to develop a mutually agreeable plan for public safety outage management notification protocols and format.

(h) A description of the standard for vegetation management to be used by the electric utility and, if that standard exceeds any other standard for vegetation management required by any applicable statute or regulation, a description of how and why the standard exceeds those requirements.

(i) A description of the standard for patrols and detailed inspections of electric utility infrastructure and, if that standard exceeds any other standard for such patrols and inspections required by any applicable statute or regulation, a description of how and why the standard exceeds those requirements.

(j) A description of the actions that the electric utility will take to ensure that its system will achieve a reasonable level of safety, reliability and resiliency and to ensure that its system is prepared for a natural disaster, including, without limitation, vegetation management, patrols, inspections, testing, and hardening and modernizing its infrastructure with improved engineering, system design, standards, equipment and facilities, such as undergrounding, insulation of distribution wires, pole replacement and other measures. An electric utility shall use prudent practices commonly used in the electric utility industry for utility design, operating practices and telecommunications to prevent its infrastructure from causing a fire and to maintain resiliency during a natural disaster.

(k) An explanation that the electric utility has an adequately sized and trained workforce to execute the natural disaster protection plan and promptly restore service after a major event, taking into account employees of other utilities available to the electric utility pursuant to mutual aid agreements and employees of entities with which the electric utility has entered into contracts.

(l) A description of how the natural disaster protection plan is consistent with the emergency response plan submitted by the electric utility pursuant to NRS 239C.270.

(m) A description of the processes and procedures that the electric utility will use to monitor and audit the implementation of the natural disaster protection plan and to take actions to correct any deficiency that is identified.

(n) A description of the participation of the electric utility, including, without limitation, any commitments made, in any community wildfire protection plans, as defined in 16 U.S.C. § 6511, established in this State.

3. For each element that an electric utility is required by subsection 2 to include in its natural disaster protection plan, the electric utility shall include in its natural disaster protection plan:

(a) An identification of how the element is expected to reduce:

(1) Ignition events in high fire risk areas and extreme fire risk areas during critical fire weather conditions; and

(2) Equipment damage and loss of power caused by a natural disaster;

(b) A cost-benefit analysis for the element; and

(c) The input relating to the element that has been provided by:

(1) Each fire protection district in the service territory of the electric utility that is covered by the plan;

(2) The office of emergency management for each county covered by the plan;

(3) The Division of Forestry, Division of State Lands and Division of State Parks of the State Department of Conservation and Natural Resources; and

(4) The Division of Emergency Management of the Department of Public Safety.

4. In addition to the information that an electric utility is required by subsections 2 and 3 to include in its natural disaster protection plan, the electric utility shall include in its natural disaster protection plan:

(a) A summary of the projected 3-year budget for the natural disaster protection plan, an identification of the projected cost elements of the plan and the projected cost for each element that the electric utility is required by subsection 2 to include in the plan;

(b) If two or more electric utilities submit a joint natural disaster protection plan, the proposed joint and direct allocation of costs between the service territories of the electric utilities; and

(c) Annual data tracking trends associated with:

(1) Ignition events, separated for ignition events:

(I) During critical fire weather conditions and during all other days in high and extreme risk fire areas; and

(II) The involvement of transmission or distribution infrastructure; and

(2) Equipment damage and loss of power caused by natural disasters.

Sec. 8. 1. If an electric utility will require additional time to implement an element of a natural disaster protection plan before the next fire season, the electric utility may request expedited treatment of that element.

2. The Commission will issue an order approving or modifying a natural disaster protection plan not later than 180 days after the date on which the plan was submitted.

3. At any time after a natural disaster protection plan has been approved and before the date on which a new plan must be submitted pursuant to NRS 704.7983:

(a) An electric utility may submit to the Commission a request to amend a natural disaster plan; and

(b) Any person may petition the Commission for the modification of a natural disaster protection plan.

Sec. 9. *The Commission will issue an advisory opinion concerning a natural disaster protection plan submitted by a rural electric cooperative pursuant to subsection 7 of NRS 704.7983, not later than 150 days after the date on which the plan is submitted.*

Sec. 10. *On or before September 1 of the first and second years after an electric utility has submitted a natural disaster protection plan to the Commission pursuant to section 7 of this regulation, the electric utility may file with the Commission a progress report concerning the natural disaster protection plan that will apply to each year remaining for the period covered by the natural disaster protection plan.*

Sec. 11. *An electric utility shall:*

1. Submit to the Commission a monthly report of comprehensive data concerning the cause of each event occurring in the service territory of the electric utility during the immediately preceding month that:

(a) Was determined by the agency responsible for fire protection in the area where the event occurred to be an ignition event; and

(b) Took place in an extreme fire risk area or high fire risk area.

2. Notify the Commission not later than 24 hours after:

(a) A power outage initiated to preserve public safety or a proactive de-energization event;

or

(b) A wildfire occurs in the vicinity of the infrastructure of the electric utility that burns more than 1 acre of land.

3. Not later than 1 month after an event described in subsection 2, submit to the Commission a report containing a full description of the event.

Sec. 12. *1. An electric utility shall separately track and account for in its books and records all prudent and reasonable expenditures made by the electric utility to develop and implement its natural disaster protection plan.*

2. On or before March 1 of each year, an electric utility shall submit to the Commission an application to recover the cost of prudent and reasonable expenditures made by the electric utility during the immediately preceding year to develop and implement the natural disaster protection plan of the electric utility pursuant to subsection 6 of NRS 704.7983. The Commission will issue a final decision on the application not later than 180 days after the date on which the application was submitted.

Sec. 13. *1. An electric utility may, upon placing into operation a new capital project constructed or acquired by and owned by the electric utility pursuant to a natural disaster protection plan, create a regulatory asset or liability account for the capital project.*

2. Beginning 1 month after the date on which a new capital project for which a regulatory asset or liability account is created pursuant to subsection 1 is placed into plant in service, the electric utility that maintains the account shall separately calculate and record in the account:

(a) A return on investment for the capital project using the most recently authorized pretax rate of return on the net plant balance of the capital project. The net plant balance of the capital project must be calculated by subtracting from the costs of the capital project the sum

of the accumulated depreciation and the accumulated deferred income tax for the capital project.

(b) Depreciation expenses related to capital projects included in the natural disaster protection plan pursuant to paragraph (c) of subsection 2 of NRS 704.7983.

(c) Actual incremental monthly operations and maintenance costs incurred to carry out the natural disaster protection plan.

(d) Carrying charges on the costs described in paragraph (c) at the most recently authorized rate of return.

3. The amounts recorded in a regulatory asset or liability account pursuant to subsection 2 must be separately identified and excluded from a general rate case.

4. An electric utility shall annually submit to the Commission a request to clear the accumulated balance in a regulatory asset or liability account created pursuant to subsection 1 and include the account in the request. The request must include:

(a) A proposed period for recovery and amortization of the regulatory asset or liability that ensures that the utility does not recover more than the actual accumulated balance of the account;

(b) A detailed reconciliation of the amount of recovery requested to the approved budget items, showing carrying charges separately; and

(c) Proposed rate design and rates by customer class for the annual recovery requested in a separate line item on a customer's bill.

Sec. 14. 1. *An electric utility may apply to the Commission for authorization for a person who is not an employee of the electric utility to perform tree trimming related to line*

clearance in an easement or right-of-way dedicated or restricted for use by the electric utility pursuant to subsection 3 of NRS 704.7985. The application must include:

(a) The name, telephone number, mailing address, electronic mail address and physical street address of the person;

(b) A copy of each business license or certificate issued by this State or any political subdivision thereof to the person; and

(c) Proof that the tree trimming will be performed under the direction of an arborist certified by the International Society of Arboriculture.

2. If an electric utility utilizes a person who is not an employee of the electric utility to perform tree trimming related to line clearance in an easement or right-of-way dedicated or restricted for use by the electric utility, the electric utility shall maintain records confirming that:

(a) The person is authorized to perform the tree trimming by the Commission; and

(b) The tree trimming was performed under the direction of an arborist certified by the International Society of Arboriculture.
