AN ACT relating to public health; allowing a physician to issue an order for auto-injectable epinephrine to a public or private school; providing for public and private schools to obtain auto-injectable epinephrine under certain conditions; requiring public and private schools, if feasible, to provide certain training to employees and to develop a comprehensive plan concerning anaphylaxis; and providing other matters properly relating thereto.

Legislative Counsel’s Digest:
Existing law allows the parent or legal guardian of a pupil in a public school to request that the pupil be allowed to carry and self-administer medication for the treatment of asthma or anaphylaxis in certain circumstances. If this request is granted, the school is allowed to store additional doses of the medication for the pupil’s use and the board of trustees of the school district, the school district and the school and the employees or agents thereof are immune from liability for any injury to or death of the pupil as a result of self-administration or a failure to self-administer the medication. (NRS 392.425)

Sections 14 and 16 of this bill allow a physician or osteopathic physician to issue an order for auto-injectable epinephrine to a public or private school to be maintained at the school for the treatment of anaphylaxis that may be experienced by any person at the school. Sections 14 and 16 also provide that a physician or osteopathic physician is not subject to disciplinary action for issuing such an order to a school.

Section 7 of this bill requires each public school, including, without limitation, each charter school, to obtain an order from a physician or osteopathic physician for auto-injectable epinephrine to maintain the drug at the school. Section 12 of this bill similarly authorizes a private school to obtain and maintain auto-injectable epinephrine at the school. If a public or private school obtains an order for auto-injectable epinephrine, sections 3.5, 7 and 12 of this bill allow a school nurse or other designated employee of the public or private school, as applicable, who has received training in the storage and administration of auto-injectable epinephrine to possess and administer auto-injectable epinephrine to a pupil on the premises of the school during the school day who is reasonably believed to be experiencing anaphylaxis. Sections 4, 10 and 12 of this bill require training in the storage and administration of epinephrine to be provided to designated employees of a public or private school. Section 15 of this bill provides that a nurse is not subject to disciplinary action for administering auto-injectable epinephrine pursuant to a valid order issued pursuant to section 14 or 16.

Sections 9 and 13 of this bill require each public or private school, to the extent feasible: (1) to provide training concerning food allergies to certain employees; and (2) to develop a comprehensive action plan for anaphylaxis.
