We have not used the method used traditionally by both parties to select a Speaker. I would like to point out to you that the election laws of the State of Nevada make it plain that the majority party in the lower house of the Legislature has the power to caucus together and select their Speaker. We have let outside interests enter into this, and have separated the party. We have not been wise in our judgment."

Mr. Swackhamer remarked as follows:

"I would like to place in nomination, for the present Forty-sixth Session of the Assembly, for the Nevada Legislature, a man whose integrity and ability have been adequately demonstrated while serving many sessions. A man who will lead this group forward to grow and benefit all of the people in the State of Nevada. I am happy and honored Mr. Secretary, to present in nomination, Mr. M. E. McCuistion."

Mr. Waters, remarked as follows:

"I would like to place in nomination, the name of a duly elected official whose credentials have been examined and duly accepted. This man is in a position of a majority of the majority party in this house. He is a good man and his ability could not be questioned. Fifteen of the majority party have selected this man. I feel that it is not only the duty of the Democrats,

but every man to select a member of the majority of the majority party. It gives me great pleasure to nominate Mr. William Embry, who is neither a gambler nor a crook, but a service station operator."

Mr. Ryan moved that nominations be closed.

Mr. Leighton moved the adoption of the report.
Motion carried.

Mr. Robins moved that the Speaker be authorized to appoint two floor leaders.

Mr. Ryan remarked as follows:

"Mr. McCuistion, when you gave your acceptance speech as Speaker a short time ago, you stated that you would do all in your power to promote good legislation and be fair and just in your dealings with everyone and that you would do your best for the good of the State. The 15 good Democrats who were defeated by the other 14 men, and they took the defeat and were good sports about it, and decided to pledge their support to the Speaker and work for the good of everyone concerned. I believe you will agree that the representative party has not been given the opportunity of selecting the floor leader of the majority party. We have not consented to go along with the coalition of the two parties, and rescind our rights as the majority party to select a leader. I would like to call your attention to the rules of the Assembly. Mr. Speaker, you are out of order in appointing the two floor leaders. That has always been the prerogative of the majority party. I ask that you rescind this motion and let the good Democrats have a caucus and choose our own floor leader. I believe we are entitled to this much consideration."

Mr. Crawford remarked as follows:

"Mr. Ryan is the floor leader."

Mr. Rudiak requested a division of the house on Mr. Robins' motion.
Mr. Robins' motion carried.

Mr. Ryan requested a five-minute recess.
Mr. Speaker refused the request.

Mr. Ryan remarked as follows:

"Mr. Speaker you are out of order according to Mason's Manual. You are not giving me any consideration, especially since I went to you and talked about this before it was ever brought on the floor. I make the motion that the motion before the house be tabled."

Mr. Ryan was informed by the Speaker that the motion had already been carried.
Remarks by Mr. Rudiak.
Mr. Speaker appointed Mr. Higgins and Mr. Rowntree as floor leaders.

Mr. Higgins moved that the Assembly adjourn until Tuesday, January 20, 1953, at 11 a. m.

MESSAGE FROM THE GOVERNOR

STATE OF NEVADA
EXECUTIVE CHAMBER

CARSON CITY, January 16, 1953.

To the Honorable, The Assembly:

May I take this opportunity as Governor to welcome into session the Forty-sixth Session of the Nevada State Legislature.

As your honorable body convenes, carrying out a Constitutional requirement imposing certain duties upon each and every one of you, I, likewise will be fulfilling a duty which necessitates my absence from the State.

As this message is read to you, I will be carrying out a duty, and I will admit a pleasant one, of representing the State of Nevada in Washington, D. C. at Inaugural Ceremonies for Dwight D. Eisenhower and Richard M. Nixon.

My decision to not be present with you on your opening day was not reached hastily or without considerable thought. For more years than I can remember, the State of Nevada has always been represented by its Governor at the inauguration of a President of the United States. I felt I must continue that precedent despite the fact I could greet you only in this manner.

I am submitting my biennial budget message to you on your opening day which I know your honorable body will appreciate. This will allow you to begin work immediately on this important phase of your duties.

It will be my great pleasure to appear before you and deliver my legislative message on Monday, January 26.

Again, may I welcome you to Nevada's seat of government and offer you the services of my office staff at any and all times to assist you.

Sincerely yours,

CHARLES H. RUSSELL, *Governor.*

THE STATE OF NEVADA
EXECUTIVE CHAMBER

CARSON CITY, January 19, 1953.

To the Honorable the Assembly:

Pursuant to the provisions of Chapter 299, Statutes of Nevada of 1949, I herewith respectfully submit the Executive Budget for the fiscal years 1954 and 1955, together with recommendations for expenditures and classified estimates of receipts from all sources.

This budget is being submitted to your honorable body on this opening day of the forty-sixth regular session of the Nevada Legislature in the sincere hope that it will enable you to proceed with your duties without undue delay, because of the constitutional provision which prevents consideration of any appropriation bills prior to the presentation of the budget message.

Accompanying the budget message, as was the case two years ago, is a draft of the general appropriation bill which will enable your committees to utilize such document as a working copy, if they so choose, to the end that the general appropriation bill may be formally introduced when agreement as to final form has been reached.

For the first time the budget submitted this year includes as nearly a complete breakdown of expenditures, even to minor items, as has been possible to obtain. This same breakdown has been projected for each of the fiscal years of the coming biennium.

For the first time in the history of the State the budget includes the past performance and estimated expenditures of every State agency, regardless of whether a general fund appropriation is required, or whether the revenue is from sources other than the general fund.

This has been done so that the taxpayers of the State, as represented by your honorable body, will know exactly the cost of operating this business, truly a big business, which is your State.

The budget is indexed to permit each of you to more readily locate information which you may desire. The index, I believe, is self-explanatory.

Again this year, the computation of the tax levy and the budgetary summary show the balanced relation between the proposed expenditures which I am recommending and the anticipated revenue for the coming biennium.

Bills which will implement the carrying out of many provisions of this budget have been prepared for introduction and will be presented this day so that consideration of them may be expedited for your convenience.

The continued inflationary trend not only in our own State, but throughout the Nation and the world, naturally, is reflected in the budgetary recommendations.

In that connection I particularly call your attention to the fact that proposals for increases in salaries for State employees are presented as a definite recommendation and the bill to effect such will be introduced today.

Careful study by my office has revealed a very real need for such increases, both for the elective officials and employees.

It has been my intention in presenting the salary recommendations to equalize, insofar as possible, inequities, realizing that a real equalization will not be possible until a survey to determine classification of employees, on the basis of equal work for equal pay, is completed by persons particularly skilled, by long experience, in that type of endeavor.

This budget, also for the first time, includes the request of departments, agencies and institutions for appropriations to be used for capital improvements—new constructions, repairs and renovations.

The salary increase recommendations have been limited in practically all instances to a maximum of ten (10) percent.

As was the case two years ago, I have attempted to include in the budget a completely financed plan for the operation of the State government. Thus, it is hoped that it will be unnecessary for the Legislature to be called upon to appropriate additional large amounts for the operation of the government.

I urge you, with all the emphasis at my command, to take into consideration the possibility of a change in economic conditions.

In preparing the budget for the coming biennium, particularly in regard to anticipated revenue, I sought to be conservative in order to guarantee, insofar as humanly possible, that a changed economic picture would not reduce revenues to a point where income would be less than expenditures.

Many of the requests for funds which have been presented to me through the budget office have been predicated upon the premise that a neighboring or other States do thus-and-so.

Such arguments, I do not believe, necessarily are valid.

Nevada is a State large in area but small in population. It appears to me that it is futile for this State to attempt to predicate its government on the policy of another State.

The heaviest request for funds, as has been the case in each of the legislative sessions since 1947, has come from the Education Department.

While the budget requests of the Department of Education were based upon a completely new formula of aid to the elementary and high schools, I have based my recommendations entirely upon the existing statutes with the increases above the 1951–1953 appropriation accounted for by the anticipated growing enrollment.

Reversing the trend which has been in progress for many years, the requests of the Welfare Department for Old-Age Assistance have decreased this biennium.

That decrease, I honestly believe, is due in a great measure, if not entirely, to the enactment of wise legislation, two years ago, known as the Relative Responsibility Act.

Taking into account the increased salaries which have been recommended and are vitally necessary for the continued efficient operation of the State, together with the increased cost of aid to the schools, the budget for the coming biennium actually indicates a lowered cost of government.

The lowered cost of government can be traced directly, I believe, to two sources—the Budget Office and the Purchasing Department.

The efficiency with which those two agencies have operated will continue.

In connection with those two offices it may well be noted that an increase of $30,000 in the Revolving Fund of the Purchasing Department has been recommended, while I believe that the additional Clerk requested for the Budget Office is vitally necessary.

The $30,000 increase in the Revolving Fund of the Purchasing Department will permit extension of the operation of that agency, with increased savings to the State of Nevada.

An additional clerk in the Budget Office is necessary when it is considered that an average of more than 3,000 individual claims pass through that office each two-week period, and each of those claims must be scanned carefully and separately.

The requests for the capital improvements recommended in the budget could, I believe, be met by a bond issue, or bond issues.

I have concluded, after careful study of each budget request, of each agency asking an appropriation, that my recommendations are just, and in line with the times.

The Budget Director, who has worked with me in studying the requests in conferences with the heads of the departments and agencies, represents my office and will, if you or your committees desire, discuss in detail with you the reasoning which resulted in the decisions reached in this budget.

Personally, as always, I offer you my wholehearted cooperation at all times in working out problems for the benefit of the State.

Sincerely yours,

CHARLES H. RUSSELL, *Governor.*

A PRAYER FOR INTERNATIONAL COOPERATION AND THE WILL FOR PEACE

O Eternal God, the Father of all mankind; grant unto us as citizens of this State, of this Nation, and of the world today such a clear vision of the sin and futility of war, that our consciences may be quickened, and our wills inspired to earnestly seek that cooperation between nations which alone can make war impossible.

As man by his inventions has made the whole world into one neighborhood, grant that we may help, by our cooperations, to make the whole world into one brotherhood.

Grant us wisdom, that we may discern the causes of conflict, the things which make for international hate and jealousy. Help us to break down all race prejudice; give us courage and faith to lift our voices against all private greed, social injustice, the aggression of the strong against the weak, and whatsoever else works enmity between man and man, class and class, nation and nation. Help us to stay the greed of those who profit by war, and the ambitions of those who seek imperialistic conquest. Guide all statesmen in all nations to seek a just basis for international action in the interests of an enduring and righteous peace; and especially guide and bless the present United Nations organization in all their efforts to this end.

Create within us a passion for the reign of righteousness, the spread of brotherhood and good will among the nations; and help us as thy servants to commend to all peoples the ideals thou hast given us: the sacredness of life, the liberty of conscience and opportunity, and the pursuit of true happiness for all men. Arouse in the whole body of thy people everywhere an adventurous willingness that, as we have sacrificed greatly for war, so for international good will and peace, we may dare bravely, think wisely, decide resolutely, and achieve triumphantly, as we follow in the way of thy Son, the Prince of Peace, Jesus Christ, our Lord. Amen.

MESSAGE OF THE GOVERNOR TO THE FORTY-SIXTH LEGISLATURE OF NEVADA

STATE OF NEVADA
EXECUTIVE CHAMBER

CARSON CITY, January 23, 1953.

To the Honorable, the Senate and the Assembly:

It is an honor and a pleasure to deliver my message as Governor to the Forty-Sixth Session of the Nevada State Legislature.

There are many of you with whom I served in the Legislature, both in the Assembly and the Senate, in past years, and to these old friends as well as to other distinguished members I offer my sincere congratulations. We each have a duty to our counties and our State which has been imposed upon us by the people. We have to reflect that responsibility by serving to the best of our ability toward the end of better government in meeting not only the progress taking place in Nevada, but also to better conditions for future development and welfare of our people.

I, with my administrative staff, intend to work in cooperation with you. Our services are available at all times for we are interested in one thing—Nevada and its people.

We still are in an unsettled economic condition, brought about largely by the existing National Emergency of fighting, first, an undeclared war, and secondly, the spread of Communism and other forms of totalitarianism which would strike at undermining our form of government. To me there can be no compromise, on the National or State level, with Communism or other ideologies contrary to the American freedom we have learned to love and cherish.

Today we in Nevada stand united, as we have in the past, behind a constitutional form of government, promulgated and carried out by the American people. We must examine closely the part our State plays in the Nation's economy and how we can remain stable and secure.

To maintain our strength within this State it behooves us to hold our expenditures within our income, to give such service to our State and people necessary for better government, and consistent with economy in obtaining dollar for dollar value.

STATE FINANCES

Your honorable bodies already have received my biennial budget message and will have noted that Nevada's financial condition continues sound.

You also will have noted the unprecedented demands for funds which came from all State departments and agencies.

You have before you a bill seeking to equalize and adjust salaries of State employees in an effort to eliminate inequities which have existed for many years. I also have recommended that the elective officers of the State be granted salary increases commensurate with the duties they perform.

These recommended salary increases for elective and appointive officers and employees are necessary to maintain Nevada's high standards of governmental operation and to guarantee that qualified persons continue to interest themselves in State Government.

While exceptionally heavy demands were made for financing and many requests were presented for capital improvements, I reiterate the statement made in my budget message that it is my belief that no new taxes will be necessary. Neither will it be necessary to increase the State tax rate, provided the Legislature follows budget recommendations and maintains its well-established reputation for economy.

Elimination of what many might term luxuries in government and the adherence to the same policies which are followed in private business will insure continued financial stability in the State.

No effort should be made to extend the level of State Government.

Rather, I believe, it would be well for the Legislature to consider a retreat from centralization, which would effect further economies.

HOME RULE

It is my feeling that for too many years there has been a growing tendency toward centralization which, in my opinion, can end only in ultimate destruction of the fundamentals upon which this Nation was founded.

While the greatest cry against centralization is voiced against the expansion of the Federal Government, careful consideration will reveal the same evil is to be found at the State level.

The tendency for the State to assume obligations which should belong to the counties is one which removes government further and further from those who are most vitally interested—the individual.

This assumption of duties and obligations by the State is directly opposed to the theory of a representative form of government. It is costly, creating as it does, an additional corps of administrative officials and employees.

Those best qualified to judge the needs of any community or county are those residing in that area.

I recommend you give most careful study to plans which would restore to the counties those functions which rightfully belong to the counties and retain for the State only such functions as are truly functions of the State.

Elimination of special bills, such as those establishing salaries of county officials, from the legislative agenda would save a great deal of time and considerable money.

The Legislative Counsel Bureau after a detailed painstaking study of the problem of home rule for Nevada has made certain specific recommendations in its bulletin Number 15 entitled, "Home Rule In Nevada."

All of those recommendations are in keeping with the theory of home rule and are commended to you.

Resolutions providing for such steps have been introduced. I urge their adoption.

GAMBLING CONTROL

The power to regulate gambling on the State level first was given the Nevada Tax Commission in 1945 and subsequently provisions for licensing and regulation have been changed by succeeding sessions of the Legislature.

The Commission, due to a direct lack of authority, has been faced with many problems in issuing licenses and in enforcing rules and regulations made by the Commission.

I strongly urge that this session of the Legislature give the Commission complete power to deny or revoke any and all licenses.

I further strongly urge the Legislature consider amending our gambling control laws to require that every license applicant establish a six-month residence.

I also make the following recommendations to keep gambling in Nevada clean and on a sound level of operation, thus protecting the public as well as that phase of State industry:

1. An application to the Commission and approval thereof should be necessary for the establishment or purchase of a gambling business, for an option or agreement to purchase such a business, for a loan agreement based directly on the security of implied control or eventual control, and any other means of transferring such business or any interest therein by way of lease, rental, stock purchase, management, contract, option, etc., which might result in control or partial control.

2. Before approving any of the above transactions the Commission should be required to hold a preliminary hearing and first reading, with regular hearing and final decision to follow at least 60 days after the first reading.

3. A list of all applications covering such transactions should be made

available to the news-gathering services immediately after the first reading, so the public might be advised.

4. Each gambling establishment should keep on file at all times with the Commission a report, under oath, listing all owners or stockholders or shareholders of any degree whatsoever; mortgagees, or persons or firms which have loaned money to the establishment; and all persons with options or agreements by which they can exercise any control.

The Commission in turn would provide a form which would require the applicant to give full background, past residence, employment, references and addresses. Such forms must be notarized by the person as to the truth of such record.

All persons, owners, employees and others mentioned would be required to provide fingerprints of themselves, such prints to be made by the local police or sheriff at the request of the Commission.

I also ask the Legislature to give serious consideration to eliminating horse race books as a legalized form of gambling in Nevada.

Furthermore, I am convinced the Nevada Tax Commission operates without influence and in the best interests of the State. Therefore, I am opposed to any legislation that would remove the present gambling licensing and control from this Commission, or alter the number of members, the manner of selection of membership or in any other way change the present law in this regard.

ANNUAL LEGISLATIVE SESSIONS

Another step toward greater efficiency in State Government which should receive the most careful consideration and study of your honorable bodies would be provided by annual legislative sessions.

Because of rapidly changing economic conditions it appears to me more efficient control of the State's finances could be achieved by means of a budget session, limited strictly to the consideration of financial measures, on even-numbered years. All matters of State business, including financial and budget matters, would be considered on the odd-numbered years.

Such annual sessions could be so limited that the present constitutional maximum of 60 days for each biennium could be retained. As a suggestion toward the accomplishment of that objective, I believe a 15-day budget session would be sufficient and that a 45-day general session then would be possible.

I further believe that such annual legislative sessions could be handled without additional cost, and ultimately with great saving to the taxpayers provided the recommendations relative to home rule are viewed with favor and adopted.

In considering the problem of annual sessions, I call your attention to the fact that presently budgeting requires that needs of State departments be forecast a minimum of 27 months in advance, and in actual practice the projecting of income and expenditures involves, sometimes, as much as three years and often as much as 30 months.

All of you, I am sure, recognize not only the impracticability, if not the actual impossibility, of accurate and efficient financial control by the Legislature in such a situation.

Resolutions which would accomplish the desired change have been introduced. I urge the most careful study of these proposals.

PERSONNEL BILL

A few moments ago I touched, briefly, on a matter concerning those loyal and devoted persons who long have given unstintingly of their ability to the end that Nevada's State Government be constantly improved and made more efficient.

My earlier statement referred only to salaries.

Salaries, as we all recognize, are important. There are other phases of the personnel problem which are of equal or possibly greater importance.

It long has been my sincere conviction that the State of Nevada owed to its loyal and hard working employees something over and beyond mere periodic salary increases, which all too often followed far in the wake of advancing prices.

I still am of the opinion that ability and not mere political affiliation should be the gauge used in determining whether an individual is employed and retains employment in State Government. However, I always have recognized that in order that the will of the majority be served it is necessary that government be established upon a basis which permits the free exercise of the prerogative to hire and fire those in administrative and policy-making posts. If that power were not retained, elections would become something of a mockery.

Two years ago I recommended the Legislature consider the adoption of an over-all merit or personnel plan for Nevada.

Such a bill was passed in the last days of the Forty-fifth Session. That bill, I felt, did not insure the accomplishment of the primary purposes for which it was intended—the guarantee of equal pay for equal work; stabilization of personnel on the basis of ability; and finally, the guarantee the taxpayers would immediately gain the benefits to which they, too, are entitled.

As you know, the bill passed by the Forty-fifth Session was vetoed.

In the nearly two years since March 1951, members of my office staff have worked in close cooperation with a group representing employees of all, or nearly all, agencies and departments of government and the Legislative Counsel Bureau. Many long hours of research and study were devoted to this matter.

That study resulted in agreement upon a personnel bill which already has been introduced.

This bill, I can assure you, meets the approval of the employee group. Further, it eliminates those features which I found objectionable in the previous measure.

This measure sets up a job classification program coupled with a pay scale survey to guarantee that salaries be commensurate with ability and service.

To be as certain as humanly possible that the survey upon which the job classification and pay plan is based will be fair and equitable, I have asked your honorable bodies to provide sufficient funds to employ an outside agency recognized and skilled in the complex field of governmental operation, job classification and compensation.

I urge, with all the emphasis at my command, that this bill be enacted into law as early as possible so the contemplated survey may be started in order that greater efficiency and stability may become available within a reasonably short period of time.

I particularly desire to pay tribute to and recognize the splendid cooperation I received from the Legislative Counsel Bureau and the members of the employee study group, some of whom have devoted as much as four years to the problem which I feel will be solved for many years to come if this bill is passed.

CONSERVATION AND TAXATION OF OIL AND GAS

I call attention of the Legislature to a bill which has been introduced looking toward the application of the principles of conservation to the production and use of mineral resources. I refer to a bill which would create the Nevada Oil and Gas Conservation Commission, part of the duties of which would be to prohibit waste of oil and natural gas.

Scientific studies have convinced many of the Nation's best geologists that in the geologic past, favorable conditions existed for the formation of oil and gas in Nevada. It is the opinion of such experts that these natural resources may still exist in commercial quantities. Within recent years, several millions of dollars have been spent in prospecting for oil and it may take millions more before modern prospectors are rewarded. We should, however, encourage the quest. The conservation policies stated in the proposed Act have been found to be wise and sound in many oil producing States. The Interstate Oil Compact Commission, the chief interest of which is oil production and conservation, has informed us passage of such a law prior to discovery and production is a wise and farsighted action.

I most sincerely recommend passage of this Act as in the interest of the State and its economy.

It also is provident for the Legislature to consider a method of taxation for an oil producing industry. There are three principal types of taxes that could

be applied to companies engaged in the oil and gas industry. They are: (1) the ad valorem tax; (2) the severance tax; and (3) the present State net proceeds tax.

MINING

Net proceeds of mines reached an all-time high in Nevada during the year 1951 and it is indicated that in the year just ended that record will be closely approached, if not surpassed.

Income to the State of $505,487.48 was reported from the net proceeds of mines during 1951 on an assessment of $16,617,853.18, while for the first six months of 1952 the income was $242,774.97 on an assessment of $8,538,263.67.

Those figures impress the fact mining, as always, is one of Nevada's as well as mankind's basic industries.

A well balanced economy requires mining continue in a healthy condition and that every effort be made to encourage it to greater attainments.

Much of modern industrial civilization is dependent upon a steady flow of mineral raw materials. World War II proved that the national security is in danger when the Nation is unprepared to produce, or cannot obtain, proper minerals.

The standard of living also would be lowered if the flow of adequate mineral supplies should cease or be seriously impaired.

It is to the interest of all to encourage in every proper way the mining industry in all of its phases—discovery, mining and treatment of minerals.

AGRICULTURE AND LIVESTOCK

The fields of agriculture and livestock along with mining represent one of Nevada's basic industries.

When the dual industries of livestock and agriculture prosper the State prospers. When those industries fall upon evil days the entire economy suffers.

Generally speaking, during the last two years prices paid for products of these two basic industries can be described as good.

It must be remembered, however, that such prices have not been directly reflected in the net income of the agriculturists and the livestock operators, due to materially higher costs of labor, materials and all of those things necessary for successful operation.

These basic industries are necessary for the economic stability of the State and for the physical well-being of Nevada's residents. They must continue to prosper. I urge your honorable bodies give sympathetic consideration to all legislation designed to advance agriculture and livestock. I also urge, by the same token, that no steps be taken which could in any way be detrimental to that great segment of our population.

The conservation and development of adequate water supplies for present agricultural and livestock ranches are of vital importance. It is equally important consideration be given to programs which will bring now barren acres into production, thus increasing the population and income of Nevada and adding to the prosperity of all residents of the State.

DISASTER RELIEF

Twice during the past four years the State of Nevada has been forced to call upon the Federal Government for assistance in opening roads and providing other snowbound operations. In March of 1952 there were no State funds available to meet the snow emergency and Federal assistance came at a time when county funds were exhausted. It should be borne in mind no State funds are, or have been, available for such purposes.

To meet a possible future emergency I urge the passage of a bill authorizing the withdrawal from the general fund of the State sums up to $50,000 on approval by the State Board of Finance.

Nevada has been notified that in the future if we expect to obtain such assistance from the Federal Government, the State must be in a position to show its good faith in matching such funds.

The speedy assistance by the Federal Government in 1949 and 1952 resulted at both times in the saving of thousands of head of cattle and sheep.

STATE PROPERTY—WATER SUPPLY

For the last several years the growth of Nevada's State Government in Carson City has posed a problem which has become more and more acute. That problem is water supply.

Two years ago I called attention to this situation and recommended a study by the State Engineer.

The opportunity now has arisen for the State to acquire the water rights held by the defunct Virginia & Truckee Railway.

Those rights can be acquired for $12,500 and would solve the problem for the forseeable future.

I have included in the budget of the Department of Buildings and Grounds an item for that amount and a bill authorizing the purchase has been introduced. I urge its passage.

HIGHWAY PATROL

One of the most pressing problems of this State, and of the entire Nation, is reduction of the terrible toll taken in accidents on the highways.

More rigid enforcement of safety and driving laws is needed in order to protect the public.

Reasonable expansion of the Nevada State Highway Patrol will result in more rigid and necessary law enforcement and contribute greatly to reduction in traffic accidents.

Further expansion of the Patrol should, I am convinced, result in increased revenues for the State.

As you know, the Patrol in addition to its duties of enforcing safe driving regulations is charged with enforcement of motor vehicle registration laws; motor vehicle carrier regulations; Operators' and Chauffeurs' License Act; and Use Fuel Act.

As an example of the increases which may be expected from an expanded Patrol, I point out that collections made by the organization in 1950 for the Public Service Commission and turned over to the Highway Fund amounted to $896,493. That was increased in 1951 by 29 percent, with a further 16 percent increase to $1,342,550.08 last year.

Records also indicate an 18.5 percent increase in revenue by the Motor Vehicle Division in the last biennium and a 27 percent increase in revenue by the Drivers' License Division in the same period, largely due to the enforcement program of the Patrol. The Patrol also can be credited with some portion of the 84 percent increase in revenue of the Use Fuel Division of the Tax Commission.

Cost of increased Highway Patrol personnel would be financed from the State Highway Fund and the increased revenue and safety would not be reflected in the State's tax rate.

A bill to increase the number of Highway Patrolmen and effect other changes to improve efficiency and operation has been introduced and I most urgently recommend its passage.

PUBLIC SERVICE COMMISSION

Study should be given to the increasing work load of the Nevada Public Service Commission. Presently the Commission is composed of the chairman as the only full-time member, the State Engineer as an ex officio member, and one part-time member. To strengthen the Commission and obtain added technical assistance to meet greater demands, I recommend the State Engineer be continued as an ex officio nonvoting member and that an additional full-time member be authorized, such member to be appointed by the Governor. The Commission would then include the chairman, a full-time member, a part-time member and the State Engineer as ex officio nonvoting member for the technical information he could both receive and provide.

HIGHWAY

Our highways have been constructed and maintained at a high standard during the last biennium. During the 1952 calendar year, $6,547,349 was spent in constructing 452 miles of primary, secondary and mine access roads. Airport construction and plant improvements totaled $322,777. Maintenance costs

were $2,354,561 for a grand total of highway construction and maintenance of $9,224,637.

For more efficient Highway Department operation, I recommend:

1. Authorization for the Department to obtain land in fee simple title rather than under easement and to disperse any of that acquired land not needed for highway purposes.

2. Authorization to establish speed zones along sections of highways determined to be hazardous to life and property.

In order to hold and obtain suitable personnel, both engineering and office, you have noted in my budget message my recommendation on salary schedules.

ATTORNEY GENERAL

The drafting of bills for presentation to the Legislature at its sessions is one of the most important functions of State Government.

Presently that duty is lodged with the Attorney General of the State. It is his suggestion, which I wholeheartedly recommend, that this duty be transferred to the Commission for the Revision and Compilation of Nevada Laws.

The Attorney General also has called my attention to the fact that Nevada's statutes relating to habeas corpus are antiquated, having been unchanged since Statehood. It is the opinion of the Attorney General that the present statutes dealing with writs of habeas corpus are filled with loopholes. I urge that you carefully consider these laws with a view of closing any such loopholes which may exist.

Further, I specifically call your attention to the recommendations made by the Attorney General in his Biennial Report. Those recommendations cover a wide field in which statutory revisions could be made to improve government.

STATE ENGINEER

Work in the office of the State Engineer is increasing rapidly and its importance to the development of Nevada is becoming more and more apparent.

The State Engineer is responsible for the administration of the water laws and is vitally concerned with all phases of water conservation, development and use.

An Act was passed at the 1951 Session of the Legislature creating the Columbia Basin Interstate Compact Commission of Nevada. The Columbia Basin Interstate Commission, consisting of six States, now is working actively on an interstate compact. Nevada's interest in the waters of the Columbia River Basin arising in the State is well documented in a report just released. That report shows the present and potential future use of such waters.

Because I believe in the importance of this work I recommended in my budget message an appropriation sufficient to defray expenses of the Commission during the next two years.

Stream measurement and ground-water studies have been carried on by the State Engineer for many years in cooperation with the U. S. Geological Survey. Continuation of those programs together with the cooperative snow surveys carried on with the Soil Conservation Service is most important.

Practically all of the public domain of the State now is under direct administration of Federal agencies, and consideration now should be given by this Legislature with a view of amending the Stockwater Act (Chapter 201, Statutes of 1925), and the Nevada Range Law (Chapter 226, Statutes of 1931) so that the needs of the livestock industry will be more nearly met.

SURVEYOR GENERAL

The first step to accomplish a major change in Nevada's constitutional governmental offices was taken when the 1951 Legislature passed a resolution calling for the abolition of the Office of Surveyor General. That resolution must be passed again by this Forty-sixth Session to qualify it to go on the ballot at the next general election.

I recommend, as I did two years ago, that the Legislature pass the resolution and allow the voters of the State to decide the matter.

Because the Legislature indicated two years ago that it agreed the Office

of Surveyor General no longer was necessary, due to decreasing business, this year I am recommending that one position in the office be abolished.

The slackening of work in the Surveyor General's office is demonstrated by the fact there are only about 1,000 acres of State land available for purchase.

PUBLIC WELFARE

During recent years there has been a continued enlargement of public welfare activities. I recognize the necessity of adequately providing for those unfortunate people who, largely through no fault of their own, are unable to take care of themselves.

I do ask, however, that the Legislature carefully study any bills which would further extend the welfare services with this view in mind: first, are the extended services needed; and second, what will be the cost, with the realization that when any new trend in public welfare services is embarked upon it is difficult to halt or correct in the future?

The Nevada State Children's Home is under the administration of the Welfare Department. There has been considerable discussion in recent years as to whether administration of the Children's Home should be removed from the Welfare Department's control.

I urge you most carefully consider this question to determine whether such separation would react to the final benefit of the minors involved.

I call your attention to the increased cost of maintenance of each child, giving particular attention to the fact nearly all of the boys and girls at the home are not orphans, but come from broken homes.

The present cost of maintaining a child at the home approximates $100 each month. Legislation should be enacted to insure the State will be compensated for care at least to the extent of 50 percent.

To accomplish that purpose it is suggested as a requirement of admission the committing authority guarantee 50 percent of the cost of support of each child and such be remitted monthly to the superintendent of the Home to be deposited in the State Treasury. Where the parent or parents are unable to pay all of the cost, it is suggested steps be taken to insure the difference be paid by the county of residence of the child.

The same provisions should be enacted into law with regard to the State School of Industry.

VETERANS

Passage by the Congress, last summer, of the Veterans' Readjustment Act of 1952 involved certain obligations for the States. Those obligations are in connection with benefits to veterans returning from the Korean war. To carry out those obligations, and at the express request of heads of the veteran's organizations of Nevada, I designated the State Veterans' Service Commissioner, his deputy in Las Vegas and the State Superintendent of Public Instruction to handle certain phases of this matter. In view of the added duties of the offices of the Veterans' Service Commissioner, I included recommendations in my budget for modest increases in appropriation to that office.

COLORADO RIVER COMMISSION

BASIC MAGNESIUM PROJECT

Two years ago the State of Nevada owed the Federal Government for the Basic Magnesium plant and Henderson Townsite a total of $18,927,003.61. Today, the Colorado River Commission has successfully completed the sales and transfers which fully meet all the obligations to the United States Government, these totalling $24,021,424, the purchase price by the State of those facilities.

There now is added to the public tax roll the huge project, including plant facilities and townsite, the 992 houses, apartment houses and business buildings.

During the last 16 months approximately 330 new homes have been erected and 350 more are under construction. Two years ago there were 650 persons employed at the plant facilities. That number has been increased to approximately 3,000 and the city of Henderson has gained in population from 2,000

to about 9,000 or more. It is now one of the largest cities in the State. Payrolls at the plants total over $1,000,000 a month. New construction has exceeded the total purchase price paid to the government. More construction is under way now.

On April 1, 1948, the State of Nevada took over the project to save it from destruction and to attempt to build the wartime facilities into an industrial center. Many problems were encountered by the Colorado River Commission, since the Federal agency retained final approval on all negotiations and contracts.

I firmly believe the Colorado River Commission has faithfully served Nevada in making the plant and townsite a part of Nevada, instead of a ward of the State as it was two years ago.

Furthermore, the Commission has completed its obligation to the Federal Government which, under the Letter of Intent under which the State took over the property, demanded that six months after the power for the plant became firm, Nevada enter into a complete plan of sale for all properties.

This has been accomplished, and I sincerely urge the Nevada State Legislature to name a committee to investigate every phase of the operation and sale of the plant facilities and townsite. Books and records of the Colorado River Commission are open to you, and I firmly believe a complete investigation will show that at all times the Colorado River Commission was acting in the interests of the State of Nevada.

It must be remembered plant facilities were built by the Federal Government to produce magnesium during World War II. In turn these facilities now have been rebuilt and are used by such companies as Stauffer Chemical Company, Western Electro Chemical Company, Titanium Metals Corporation of America, Combined Metals Reduction Company and United States Lime Products Corporation.

Here has been built one of the great electro-chemical plants of the West. Development of industry in that area will only be limited by one factor, and that is the availability of electrical power.

ELECTRIC POWER

The total allocation of power to the State of Nevada from Hoover and Davis power plants is approximately 977,000,000 kilowatt hours annually, with 741,000,000 coming from Hoover and 236,000,000 from Davis.

Firm energy contracts have been entered into with the eight major lessees at the Basic project and others which, together with the three original contractors, Southern Nevada Power Company, Lincoln County Power District and Overton Power District, total 977,000,000 kilowatt hours.

Contracts for the current operating year which began June 1, 1952, total 820,000,000, about 893,000,000 in the 1953–1954 year and nearly 970,000,000 in the 1954–1955 year. Projected load curve studies indicate that the State of Nevada will require by 1960 to satisfy the estimated needs of its users more than 2,000,000,000 kilowatt hours annually.

Expansion of industry in Southern Nevada is dependent upon power and the Commission is completing surveys relative to a steam generating plant which I believe is needed to firm up and supply existing and future power demands.

Firm energy contracts entered into with the lessees at Basic project are as follows:

Stauffer Chemical Co.	139,000,000
Western Electro Chemical Co.	232,000,000
U. S. Lime Products	4,000,000
National Lead Company (Titanium)	151,000,000
Combined Metals (Pioche Manganese)	58,000,000
California-Pacific Utilities	20,000,000
Basic Management	12,000,000
Manganese, Inc.	6,000,000
	622,000,000

The allocation of the three original Southern Nevada contractors totals:

Southern Nevada Power	263,000,000
Lincoln County Power District	80,000,000
Overton Power District	12,000,000
	355,000,000

The full allocation, however, will be completely withdrawn and effective under contract for the 1955–1956 operating year.

During the current year the Basic firm contracts total approximately 501,000,000 and contracts to the three Southern Nevada contractors total approximately 319,000,000.

The Commission, however, has at hand requests from the major lessees at the Basic Project for additional energy, which, if we are able to obtain, will bring the total energy requirements in the 1953–1954 operating year to 1,341,000,000 kilowatt hours; in the 1954–1955 operating year to 1,725,000,000 kilowatt hours. Nevada will require by 1960 to satisfy the estimated needs of its users, more than 2,000,000,000 kilowatt hours annually.

The Colorado River Commission is continuing its studies and negotiations, through which it is hopeful of obtaining a power supply to meet these estimated increases. Negotiations have been under way for some time with agencies in Arizona and California.

Since my last message to the Legislature, the Commission has concluded a contract with the Metropolitan Water District of Southern California, through which the State has the exclusive use of generating Unit N-7 in Hoover power plant, subject to a four-year notice of recall rather than a two-year notice.

The Colorado River Commission, with the approval of the State Board of Control, has requested the Secretary of Interior to install Unit N-8 at Hoover power plant in the last remaining slot. Contracts will be entered into between the Commission and the power users under which the latter will underwrite the generating charges on Unit N-8 until 1987. In this respect the State will be completely protected.

Generating Unit A-9, a 50,000 kilowatt unit, has been installed for the exclusive use of the State of Nevada and is in operation.

The Commission has signed a contract with the Arizona Public Service Company, through which the State may obtain off-peak supply of energy from that company's facilities in Arizona, to be transmitted over the Bureau's network or exchanged for other energy in the Hoover-Davis pool.

The Commission has signed a contract with the Bureau of Reclamation for 33,000 kilowatt capacity in Shasta power plant. The State still must arrange for wheeling this energy into the western and southern Nevada areas.

The Commission has entered into conversations with a large municipal agency in Arizona for still an additional supply of energy either on a firm or off-peak basis.

The Commission has entered into contract with the Arizona Power Authority for exchange of capacity rights during peak periods and planned outage standby for its major units.

The Commission has recommended and sent plans to the Secretary of the Interior requesting funds be placed in the 1953 Deficiency Budget for the construction of a 150,000 kilowatt 230/69/13.8 kv. substation at Henderson.

With the demand for power increasing in the State, as well as in the entire Southwest area, I am hopeful plans soon may be consummated for the construction of Bridge and Glen Canyon projects and others, in the Lower Colorado River Basin.

CENTRALIZED PURCHASING

Two years ago the Legislature, acting upon my recommendation, established the Nevada State Purchasing Department.

That department has purchased supplies and materials for the various agencies of government with a saving of $100,000 over and above administrative costs. Total purchases between July 1, 1951, and January 1, 1953, amounted to $665,000.

The savings were made in spite of generally rising costs.

A few specific instances of savings: automobiles with heaters, defrosters, heavy duty oil filters and heavy duty air cleaners now are being purchased for approximately $1,550; pickup trucks, with the same accessories, are being obtained by the State for approximately $1,450; under a standardization plan, inaugurated by the Purchasing Department, only automobiles in the lower price-range field are being bought; no pleasure radios are being installed in any State vehicle; fuel oil is purchased in the Carson City area at 11.6 cents per gallon, resulting in savings to the State of $3,720; a tire contract has been negotiated on a State-wide basis with the result that 600 x 16, four-ply first-grade tires are obtained for $11.66. Savings approximating 100 percent have been effected on most all tire purchases; even greater savings have resulted from the purchase of heavy equipment.

The savings would have been much greater had the department been able to negotiate the purchase of all types of supplies.

Such all-inclusive operation was impossible because of the limited Revolving Fund placed at the disposal of the Purchasing Department. Therefore, in my budget message I have recommended the revolving fund of the Purchasing Department be increased from the $40,000 to $70,000.

EDUCATION

There is no more important phase of government than education.

Education is the very foundation upon which the Nation has been built and upon which it will continue to expand and prosper.

Schools and Universities have been faced with increasing costs like all governmental agencies and private business.

In Nevada the enrollment in the public schools has grown steadily, due to increased industrial, mining and agricultural development. That growth has resulted, in some instances, in a shortage of teachers and in crowded classrooms.

The budget and the general appropriation bill which accompanied it have taken into consideration that growth.

You will have noted that the budget recommendations call for an increase of more than two millions of dollars, or 13.71 percent, over the amount approved in tax levies for elementary and high schools during the last biennium.

My budget recommendations for appropriations for State aid to elementary and high schools, to be administered by the Department of Education, make up 48.19 percent of the total appropriations recommended in the budget.

In other words, more than 48 cents out of every tax dollar will go to elementary and high schools, if the Legislature sees fit to approve my recommendations.

Attention of the Legislature should be called to the fact that any new formula for State aid to elementary and high schools will be a continuing program.

It has been demonstrated such a program, in each biennium, calls for an ever-increasing portion of the tax dollar.

I urge that the Legislature in considering any proposed new formula for State aid to schools, weigh most carefully the long-range effect upon State finances in the future.

Just as I did two years ago I recommend the Legislature give most careful consideration to an amendment to the Constitution which would remove the State Superintendent of Public Instruction from the ranks of elective officers.

UNIVERSITY OF NEVADA

When the educational picture in the State is considered as a whole it must, of necessity, include the University of Nevada.

That is particularly true when the financial impact of education in relation to the tax dollar is considered.

Expenditures for the University of Nevada, recommended in my budget, will swell the total to be spent on education to more than 10 millions of dollars for the next biennium.

That would mean that 65.08 percent of the total recommended appropriations would go for education, or approximately 65 cents out of each tax dollar.

Conditions at the University of Nevada have continued to improve during the last biennium.

Enrollment has continued to decline, from the top of 1,817 in 1946 to 1,500 in 1950 and 1,252 on January 3, 1953.

My budget recommends an appropriation of $300,000 to be used for new construction at the State University. That sum should be ample to meet the requirements for matching funds to insure the construction of a student union building. This I recommend.

It is my feeling that with the decline in enrollment there no longer exists a pressing need for additional classrooms.

The University of Nevada is the only institution of higher learning in the State and its development is of the utmost importance. However, it is my feeling such development should be carried out on an orderly basis of steady improvement with no attempt at overexpansion.

I have recommended certain salary increases for the teaching staff at the University. Those recommendations have been based upon the increase in the cost of living and have been kept in line with the maximum of 10 percent which was recommended for all other State employees. I feel such increase is fair.

PUBLIC HEALTH

Average life span in Nevada has increased from 33.2 years in 1910 to 54.1 years in 1951, a truly remarkable improvement.

That gain in longevity is a direct reflection of the advancement made in medical and health fields since the State Board of Health was established 60 years ago.

A current and pressing need is recodification of laws governing the reporting of births, deaths, stillbirths and infectious diseases. Presently, codes are a hodgepodge of amendments, deletions and additions.

A provision permitting the Board of Health to revise the list of reportable and quarantinable diseases by regulation would simplify the work of the Legislature and the board.

Marked progress has been made in the State's services to crippled children. The problem of rheumatic heart disease among children has received full recognition and Nevada is developing an adequate program of clinic and follow-up care aimed at minimizing the after-effects of this ailment.

The great and sudden increase of births toward the end of World War II and immediately thereafter has been reemphasized as these children reach school age. Enforcement of sanitation codes for schools and health procedures involving the children, directly, will require added time on the part of all health workers.

Further gains have been made in the slow conquest of tuberculosis. Two generations ago that disease was the State's leading death cause. Today it ranks seventh as a killer. The ultimate aim is the isolation of every case of active tuberculosis.

To provide full-time health service to the more sparsely settled areas will require enabling legislation due to the following technicality: the law now requires each county in a multi-county health unit to be represented on the governing health board by at least one resident physician. It is impossible to comply with that provision where there is no physician among the population of a county. That situation exists in more than one county.

NEVADA STATE HOSPITAL

Great strides have been made during the last two years in improving the facilities at the State institution for those unfortunates who suffer from mental diseases.

Completion of an addition to the new male ward building was a major improvement. There also has been carried out a continuing program of repainting and repairs.

However, there continues to be a considerable amount of criticism of the

operation of the institution. These criticisms appear to center on administrative policies.

It may be recalled that two years ago I expressed the belief the superintendent of the institution should be an individual skilled in hospital management, serving as business manager. The Legislature, in its wisdom, saw fit to require the superintendent be an accredited psychiatrist.

In order to permit a greater degree of choice, I urge this Legislature permit the appointing authority to designate either a psychiatrist or a business manager skilled in hospital management as the superintendent. Provision should be retained for a psychiatrist, in either event.

When any requests for additional construction at the Nevada State Hospital are presented I urge the Legislature to investigate reports that in the forseeable future, possibly within a period of from two to four years, the State may have an opportunity to acquire from the Federal Government the ground and plant of the Indian Boarding School at Stewart, Nevada.

If such acquisition is a possibility, within a reasonable time, it would appear to be unwise to continue a program of new building either at the Mental Hospital, the Children's Home or the School of Industry.

The size of the Stewart plant and its modern construction might well be utilized to answer needs of those institutions for expansion.

LABOR

The respect that Nevada's labor force holds in the eyes of the Nation equals that of any State in the Union. Through the years, Nevada has been, for the most part, exceedingly fortunate that organized labor has not sought to further its special interests to the detriment of industrial and business life and the welfare of our State.

Organized labor in Nevada has been administered, generally, by efficient and fair leaders. Employer-employee relationships have been on a high plain and problems have been met and solved amicably in a spirit of cooperation.

Nevada's harmonious labor picture will retain its status if problems as they arise can be approached in the same sane and sensible manner.

NEVADA INDUSTRIAL COMMISSION

In order to arrive at a basic policy for the establishment of rates, as well as for betterment of operation, the Nevada Industrial Commission a year ago engaged a firm of consulting actuaries to make a complete survey of its operations. This was the first actuarial survey since the law became effective in 1913.

A public meeting was held with employers and representatives of labor and industry on January 22, 1952, at which plans for the survey were discussed. A similar meeting was held November 7, 1952 to outline phases of the survey which had by then been completed.

As a result of the survey the Commission made effective a new schedule of premium rates on January 1, 1953. Under this schedule, rates are considerably lower for most industries. Rules also were adopted to reduce and simplify the work of the employers and the Commission.

The actuaries are now developing a new merit rating plan for those employers who have a good record for safety. Such employers will obtain the benefit of a premium rate lower than the base rate.

Increased mining and industry in Nevada have resulted in more than 12,000 claims being filed during the year ended June 30, 1952, an increase of more than 50 percent over four years ago and 23 percent over a year ago.

For more efficient operation automatic bookkeeping machines have been installed, and it has become necessary for the Commission to plan on utilizing the second floor of its own building to relieve crowded conditions.

A safety code has been adopted and is ready for use. In line with this, an intensive safety campaign has been started this week with an expert from the U. S. Department of Labor assisting in organizing a State-wide program.

I feel important and far reaching steps have been taken in the last year to place the Nevada Industrial Commission on a sound operating basis.

NEVADA STATE PRISON

During the last two years, conditions at the Nevada State Prison and at the Prison Farm have continued to improve. The farm is now producing all meat used at the Prison with a large saving over previous operations. More than 100 acres of new land have been brought under cultivation.

The new gas chamber has been placed in operation. Numerous improvements have been made. However, the Prison population has steadily increased from 240 men two years ago to a high of 385 in October of 1952. Although 88 were released at the November meeting of the State Board of Pardons and Paroles, the inmate population now is 350 and will approach 425 before the next Board meeting.

This has resulted in inadequate dining room capacity, and I have approved $10,000 in the Prison budget for materials to be used in constructing additional quarters for the guards and thus allow the extension of dining facilities for prisoners.

Planned construction work will be done by Prison labor.

I urge you visit the Prison and farm to appreciate fully beneficial changes made.

NEVADA NATIONAL GUARD

The first unit of the postwar Nevada National Guard was organized in November 1947. There now are active units in Carson City, Las Vegas, Ely, Elko, Winnemucca, Reno, Fallon, Yerington, Boulder City, Minden and Hawthorne. In all there are 14 units representing both air and ground services with a personnel approximating 1,000 men.

During the last biennium the Federal Government expended $1,134,754 on National Guard activities within our State. Federal property for use in air and ground Guard is valued at $6,315,871, and is available to the State for use in event of any emergency.

The Nevada National Guard payroll for instructors, caretakers and maintenance employees reached $684,731 during this biennium. Members of the Guard received drill pay totaling $298,922.

The air guard of 328 officers and men which was called into active service during the Legislative Session of 1951 returned to State control December 1, 1952 after serving for two years.

I again ask your support for the Nevada National Guard for two reasons. In this present war emergency it assures Nevada's proper contribution to National security and preparedness and provides a military standby facility. Secondly, it affords individual training to over one thousand young men in Nevada, a training for better citizenship and for preparedness to serve their State and Nation in time of need.

EMPLOYMENT SECURITY DEPARTMENT

During the last two years the Employment Security Department has concentrated on internal reorganization, operation and an examination of the problems facing State agencies which operate with moneys granted by Federal appropriation.

You can obtain copies of the Department's report which clearly indicates the problem common to all grant-in-aid agencies, namely the extent of control the Federal Government may exercise over State Governmental policy and operation. It is a problem you should examine carefully, and keep in mind as you give consideration to any legislation that might increase Federal intervention in State Government through expansion of grant-in-aid agencies or the addition of other grant-in-aid programs.

The unemployment compensation functions performed by the Employment Security Department have been carefully examined and certain basic issues have been decided by court action. It was the first time since the establishment of this Department that such court action had been taken.

The Department recently completed an actuarial study of unemployment compensation benefit financing. That study will give a new base upon which the unemployment compensation tax policy can be consistently formulated.

FISH AND GAME

I want to call your attention to the economic importance of Nevada's fish and game resources. If we are to retail our wildlife areas for posterity, proper management must be provided for such as that supplied in part by the Nevada Fish and Game Commission. Our wildlife resources are important economically, recreationally and for vacation areas. Nevada's businesses each year are paid more than $13,000,000 for hunting and fishing supplies and attendant articles and services.

The Nevada Fish and Game Commission activities have progressed greatly in the last two years. More than 20,000 acres of the 200,000-acre Stillwater Wildlife Management Refuge in the Fallon area have been developed, preserving this land and providing a hunting range generally for years to come. Under Commission supervision, more fish have been produced in State and county hatcheries than ever before. Nevada is gaining a real benefit from its wildlife resources.

MISCELLANEOUS

Recently I reactivated the Nevada Park Commission. This Commission had been allowed to lapse some years ago when the Legislature failed to appropriate money for its support. However, I feel it is due posterity to preserve points of historical interest and prevent artifacts and relics of races, which once inhabited Nevada, from being carried outside the State.

Utilization to the fullest of manpower is a necessity. To that end, as well as to serve a most humane purpose, last summer I named a State-wide committee in connection with National Employ the Physically Handicapped Week. This committee now is seeking to operate on a year-around basis instead of confining its work to one week as in the past. The work of the committee has been entirely voluntary and has been hampered by lack of funds.

CONCLUSION

In presenting my message to you I fully realize that many more recommendations as well as detailed observations of administration could have been included.

I have endeavored, however, to include specific recommendations I believe are essential at this time for better State Government. I realize also a number of the recommendations are controversial, but I present them to you for your considered judgment and deliberation.

I thank you for the earnest attention you have given me, and it is my desire to work with you, fully realizing that by Constitutional right yours is the power to formulate and approve or disapprove changes in the laws that govern the State of Nevada.

Vetoed Assembly Bill No. 69 of the Forty-fifth Session.

Bill read.

Governor's message stating his objections read.

STATE OF NEVADA
EXECUTIVE CHAMBERS

CARSON CITY, March 21, 1951.

HONORABLE JOHN KOONTZ, *Secretary of State, Carson City, Nevada.*

DEAR SIR: There is herewith deposited in your office for filing, within the constitutional time limit, and without my approval, Assembly Bill No. 69, introduced January 31, 1951, by Assemblyman Carville, and entitled, "An Act to amend an Act entitled 'An Act to regulate proceedings in civil cases in this State and to repeal all other Acts in relation thereto,'" approved March 17, 1911, as amended.

My reasons for the veto of this particular Act, is that through typographical omission an essential part of the section was inadvertently omitted from the bill. If approved in its present form the bill would narrow the scope of the Act, rather than to enlarge, as apparently had been the intent.

For the reasons herein expressed, this Act is deposited without my approval.

Respectfully submitted,

CHARLES H. RUSSELL,
Governor.

The question was put: "Shall the bill pass, notwithstanding the objections of the Governor?"

The roll was called and the Assembly sustained the veto of the Governor by the following vote:

YEAS—None.

NAYS—Adams, Barr, Bastian, Beko, Berrum, Byrne, Castle, Carlson, Christensen (Washoe), Christensen (Clark), Coulthard, Covington, Crawford, Davis, Denton, Embry, Frazier, Hardenbrook, Hawes, Hendel, Higgins, Houghton, Ivers, Leighton, Lerude, Mount, Norris, Oldham, Palludan, Reynolds, Riley, Robins, Rowntree, Rudiak, Ruedy, Ryan, Shuey, Swackhamer, Tognoni, Von Tobel, Walters, Waters, West, Wood and Mr. Speaker—45.

Vetoed Assembly Bill No. 76 of the Forty-fifth Session.

Governor's message stating his objections read.

STATE OF NEVADA
EXECUTIVE CHAMBERS

CARSON CITY, March 24, 1951.

HONORABLE JOHN KOONTZ, *Secretary of State, Carson City, Nevada.*

DEAR SIR: There is herewith deposited in your office for filing, within the constitutional time limit, and without my approval, Assembly Bill No. 76, introduced on the 31st day of January 1951, by Messrs. Crawford and Slattery and entitled, "An Act to establish a Board of Naturopathic Examiners, defining naturopathy, the organization, powers, and duties of said board, providing for a certificate to practice, applications thereto, requirements, license fees, examination of applicants, recording of license, providing penalties and all matters properly connected therewith."

My reasons for the veto of this particular Act, is that it provides that every person holding an unrevoked Certificate of Qualifications issued to him since March 10, 1950, by the Board of Examiners of the Nevada Naturopathic Physicians Association will be issued a license without examination. The association referred to is subject to no manner of control, legislative or otherwise,

and to such extent is free to set such standards of membership as it sees fit. Under the bill, this unregulated association would have the power and authority, entirely within its own membership, to name those who would become licensed under the "grandfather" feature of the bill. Obviously, this gives the public no manner of protection against the persons to whom licenses might be issued, and for that reason I believe the bill to be against public policy.

For the foregoing reasons the bill is deposited in your office without my approval.

Respectfully yours,

CHARLES H. RUSSELL,
Governor.

The question was put: "Shall the bill pass, notwithstanding the objections of the Governor?"

The roll was called and the Assembly sustained the veto of the Governor by the following vote:

YEAS—18.

Absent—Baldy and Revert—2.

Vetoed Assembly Bill No. 235 of the Forty-fifth Session.

Bill read.

Governor's message stating his objections read.

STATE OF NEVADA
EXECUTIVE CHAMBERS

CARSON CITY, March 24, 1951.

HONORABLE JOHN KOONTZ, *Secretary of State, Carson City, Nevada.*

DEAR SIR: There is herewith deposited in your office for filing, within the constitutional time limit, and without my approval, Assembly Bill No. 235, introduced on the 23rd day of February, 1951, by Messrs. Leavitt, McCuistion, and Turner, and entitled, "An Act regulating the sale and distribution of petroleum products, establishing a standard for said products, requiring the inspection of said products, and assessing a penalty for the violation thereof, and other matters properly relating thereto."

From a careful reading of the foregoing bill, it is evident that the protective measures therein provided against the sale of "wildcat gasoline" are designed to prevent the sale of such gasoline rather than to regulate. Investigation has revealed that the "tests" required by the bill would take at least two days—this by reason of lack of facilities and laboratory equipment presently available. The three-cent per gallon charge under the guise of permit is little short of a "special" tax levied against a considerable group of people dealing in other than "standard" grades of gasoline.

Assembly Bill No. 60 has already been approved by this office. That bill deals with the form of advertising required to be followed by those who deal in substandard gasoline, and is of such nature as to protect the public against misrepresentation as to grade and quality.

For the foregoing reasons the bill is vetoed and deposited without my approval.

Respectfully submitted,

CHARLES H. RUSSELL,
Governor.

The question was put: "Shall the bill pass, notwithstanding the objections of the Governor?"

The roll was called and the Assembly did not sustain the veto of the Governor by the following vote:

YEAS—38.

NAYS—Hendel, Reynolds, Riley, Rowntree, Ruedy, Swackhamer, Tognoni and Von Tobel—8.

Absent—Baldy.

STATE OF NEVADA
EXECUTIVE CHAMBERS

CARSON CITY, March 24, 1951.

HONORABLE JOHN KOONTZ, *Secretary of State, Carson City, Nevada.*

DEAR SIR: There is herewith deposited in your office for filing, within the constitutional time limit, and without my approval, Assembly Bill No. 301, introduced on the 7th day of March, 1951, by Messrs. Humphrey and Anderson, and entitled, "An Act to amend an Act entitled 'An Act relating to and providing for the general welfare of the State of Nevada and of the people thereof by providing for compulsory old-age assistance to needy aged persons in this State, as defined and provided for in this Act:' * * *."

This bill is delivered to your office without my approval for the reason that this same field has been covered by Assembly Bill No. 241, which has already been approved by me. The approval of this bill would accomplish nothing and would only serve to confuse the subject matter covered in Assembly Bill No. 241.

For the foregoing reasons the bill is vetoed and deposited without my approval.

Respectfully submitted,

CHARLES H. RUSSELL,
Governor.

The question was put: "Shall the bill pass, notwithstanding the objections of the Governor?"

The roll was called and the Assembly sustained the veto of the Governor by the following vote:

YEAS—None.

Vetoed Assembly Bill No. 332 of the Forty-fifth Session.

Bill read.

Governor's message stating his objections read.

STATE OF NEVADA
EXECUTIVE CHAMBERS

CARSON CITY, March 24, 1951.

HONORABLE JOHN KOONTZ, *Secretary of State, Carson City, Nevada.*

DEAR SIR: There is herewith deposited in your office for filing within the constitutional time limit, and without my approval, Assembly Bill No. 332,

introduced on the 12th day of March, 1951, by the Clark County Delegation and entitled, "An Act providing that in any county in the State of Nevada with a population of 25,000 people or more, the County Commissioners may, upon a petition of thirty percent of the voters of the county, be increased to five commissioners; providing compensations therefor; providing duties therefor, and other matters properly connected therewith."

It is to be noted that the bill authorizes the increase in the membership of the Board of County Commissioners from three to five in counties having a population of 25,000 people or more, on petition of thirty percent of the electors as shown by the last general election registration. On the filing of such petition requesting the increase of the board membership from three to five members, the County Commissioners are mandatorily required to increase the membership of the board to five members.

This procedure obviously deprives seventy percent of the electors from a voice in the matter, permits a minority to determine the issue, and in my opinion, is contrary to the American way of majority rule.

For the foregoing reasons the bill is vetoed and deposited without my approval.

Respectfully yours,

CHARLES H. RUSSELL,
Governor.

Messrs. Hawes, Swackhamer, and Crawford moved the previous question.

Motion carried.

The question being on Assembly Bill 332 of the Forty-fifth Session.

The question was put: "Shall the bill pass, notwithstanding the objections of the Governor?"

NAYS—Riley, Adams and Rowntree—3.
Absent—Baldy.
Not Voting—Robins.

Bill ordered transmitted to the Senate.

Vetoed Assembly Bill No. 339 of the Forty-fifth Session.

Bill read.

Governor's message stating his objections read.

STATE OF NEVADA
EXECUTIVE CHAMBERS

CARSON CITY, March 24, 1951.

HONORABLE JOHN KOONTZ, *Secretary of State, Carson City, Nevada.*

DEAR SIR: There is herewith deposited in your office for filing, within the constitutional time limit, and without my approval, Assembly Bill No. 339, introduced on the 14th day of March, 1951, by the Clark County Delegation and entitled, "An Act to amend an Act entitled 'An Act to define the manner of electing county commissioners,' approved February 21, 1893."

In depositing this bill with your office, I call attention to the fact that Assembly Bill No. 332, providing for a five-man Board of County Commissioners in counties having a population of 25,000 or more, on petition of thirty percent of the electors, has been vetoed and deposited with you and without my approval. Inasmuch as this present Bill No. 339 deals with the manner of the election of such five-man board, it could only have meaning in the event that I approved Assembly Bill No. 332. Consequently, having vetoed Assembly Bill No. 332, this present bill must fall with it.

For the foregoing reasons the bill is deposited without my approval, and is vetoed.

Respectfully yours,

CHARLES H. RUSSELL,
Governor.

The question was put: "Shall the bill pass, notwithstanding the objections of the Governor?"

The roll was called and the Assembly did not sustain the veto of the Governor by the following vote:

He possessed a rare combination of virtues. He was free from false pride, approachable and kindly. Judging from what he had accomplished in the past, it is hard to place a limit upon what his achievements might have been had he lived the allotted years of man. We shall cherish his memory, feeling always that, through his untimely passing, the State has lost one of its most gifted, useful and promising young men. Ted Carville's was a well-rounded life. REMARKS FROM THE FLOOR

Mr. Crawford introduced an old friend, Mr. Jim Riordan, who had been a member of the Nevada State Tax Commission from 1929 to 1943. Mr. Riordan was born February 15, 1870, in Hamilton, White Pine County, Nevada, and is one of the few remaining well-known native citizens of the State.

Mr. West introduced Mr. W. J. Hemingway, Chairman of the Board of County Commissioners of White Pine County.

Mr. Hendel introduced Mr. Fred Parker, Power Superintendent of Mineral County.

Mr. Chet Christensen introduced Mayor pro tem, Seth Burgess, who is now Acting Mayor of Sparks.

Mr. Hawes made the following remarks from the floor:

"Mr Speaker and Members of the Assembly:

"Usually I do not correct newspaper reporters and particularly my good friend Bob Bennyhoff. But in the January 13 issue of the *Nevada State Journal* Mr. Bennyhoff says under his by-line and I quote, 'Hawes said he would amend the measure to restore it to its original wording on Monday. He said that Chambers had pointed out that the proposed change in wording from "designate" to "recommend" would weaken the position of the game management boards.'

"Members of the Assembly, for the record, I was the one who discovered the State Control Amendment. I was the one who jumped up as soon as I read the fatal four words in the first sentence and rushed over to my good friend, Assemblyman John Oldham from Elko County, Chairman of Fish and Game, and exclaimed, 'Johnny, here we go under State Control.' That was even before I handed the bill to the clerk.

"Johnny read it, grinned and said, 'We'll see!' In fact, I was the one who told Mr. Bob Bennyhoff, Mr. Byrn Armstrong and Mr. Chet Sobsey what the import of the bill was.

"At around 6 o'clock on the evening of January 12, Mr. Larry Chambers was rushing all over Carson City looking for me. Finally he found me at the Public Service Commission Investigation. He had heard the horrible story on the radio. He waved the bill at me and said, 'Is that true?' I said, 'That's right, Larry, that is State Control.' Larry replied, 'The Federated Sportsman did not intend to end dual control.' In fact, Chambers showed me his corrected copy where 'recommend' was substituted in place of 'designated.' Also,

on his original copy he had bracketed out '/or the' and substituted, 'approved by the,' the four words which in effect means State Control.

"Mr. Chambers, Chairman of the Legislative Committee of the Federated Sportsman, should take the licking for his own mistakes rather than expect me to pull his chestnuts out of the scorching fire. I request that my remarks be recorded verbatim in the Journal."

Mr. Rowntree moved that the Assembly adjourn until Tuesday, February 17, at 11 a. m.

Motion carried.

Assembly adjourned at 4:40 p. m.

Approved:

M. E. McCUISTION,
Speaker of the Assembly.

WHEREAS, It has been recommended by the Council of State Governments that this body be continued, and that each State be represented at a series of interstate meetings by a three man group consisting of a Legislative Representative from each house of the Legislature and one highway technician; and

WHEREAS, On October 17, 1952, in a major address candidate Eisenhower declared that "Americans were being squeezed between taxes and prices"; and further declared that "a common woodshed honesty" can and should be demanded of American officials in high positions; and

WHEREAS, On February 17, 1953, the President of the United States spoke up

STATE OF NEVADA

DEPARTMENT OF HIGHWAYS

CARSON CITY, NEVADA, February 20, 1953.

HONORABLE KEITH L. MOUNT, *Chairman, Committee on Roads and Transportation, Nevada State Legislature, Carson City, Nevada.*

DEAR MR. MOUNT: The Federal Bureau of Public Roads has produced a color and sound film, in three reels, of the Maryland Road Test. The film has a running time of about an hour and a quarter. It depicts the operation of and explains the conclusions drawn from the tests conducted in 1950, under the direction of the Highway Research Board and with the cooperation of the Bureau of Public Roads.

In the test, a 1.1-mile section of typical concrete pavement, which had withstood ten years of weathering and moderate traffic with very slight distress, was subjected to six months of continuous controlled truck traffic. On each of four test lanes, pairs of trucks were operated, single-axle trucks with 18,000 and 22,400 pound rear axle loads, and tandem axle trucks with 32,000 and 44,800 pounds on the tandem rear axles.

Part One of the picture illustrates the nature and scope of the field operations.

Part Two, by means of working models and animated charts, illustrates the data collected and the conclusions derived therefrom.

The Bureau of Public Roads has very kindly loaned the film to the Highway Department and we extend to all members of the Assembly, through you, an invitation to view this film in the auditorium of the new State Office Building at 4 p. m., February 24.

Please advise if the invitation is accepted and if the time proposed is agreeable.

Sincerely,

H. D. MILLS,
State Highway Engineer.

REMARKS FROM THE FLOOR

Mr. Covington announced some time ago we had a group of Boy Scouts in our audience, and we were very proud of them, and today we had the pleasure of having a group of Girl Scouts in the gallery of whom we are equally proud. A round of applause was given in their behalf.

Mr. Mount introduced a group of young people from the Mineral County High School.

Miss Frazier introduced Mrs. Helen Scott Reed, County Clerk of Clark County.

Mr. Crawford announced that in the past an error had been made several times in addressing Mr. Speaker when making a motion. The correct wording should be "Mr. Speaker, I move, etc.," instead of "Mr. Speaker, I move you—." Mr. Crawford would like this corrected in view of the fact so many young students visit this Legislature frequently and would be led to believe incorrectly on the proper procedure.

Mr. Christensen (Washoe) commented on the fact that the Committee on Elections had been studying nine different bills concerning election laws and changes and would like to suggest that sometime in the near future the Assembly resolve itself into a Committee of the Whole for the purpose of hearing Mr. Jeff Springmeyer discuss Assembly Bills Nos. 197 to 205, inclusive, to be able to give more study and attention to these bills individually.

Mr. Speaker announced that if there were no objections, the Assembly would recess until 2 p. m.

Assembly in recess at 11:28 a. m.

SPEAKER OF THE ASSEMBLY, *Carson City, Nevada:*

In the light of astounding growth and economic development of this area since your last session, we earnestly hope a large delegation of the State Assembly will find it possible to visit Las Vegas and the nearby cities of Henderson and Boulder City during this session. This week is not too soon. In addition to Las Vegas, we would like you to see the now vast operations at Basic Magnesium plant under private ownership and Hoover Dam in its present state. Think you owe it to yourselves to make the trip. Yours for a better State of Nevada.

KEN FROGLEY, *Managing Director,*

Mr. Speaker announced that in regard to the invitation from Mr. Ken Frogley, Managing Director of the Las Vegas Chamber of Commerce, all arrangements were in the hands of Jack Higgins; the Assemblymen who intend to make the trip to Las Vegas kindly contact Mr. Higgins as soon as possible, as the members are to be flown to Las Vegas in National Guard planes.

REMARKS FROM THE FLOOR

Mr. Von Tobel introduced a former member of the Assembly, who was Speaker in 1925, District Judge Bert Henderson, of Las Vegas.

Mr. Covington introduced a dear friend of his from Sparks, Mr. Harry Brown, who is County Clerk of Washoe County.

Mr. Hawes made the following remarks:

"I have been accused of being a grafter in regard to Assembly Bill No. 23, the bill on Naturopathy. I am protected by civil law and intend to take care of and protect myself. Defamation of character is a serious charge and damages can be obtained after a trial. Truth is the only defense. Gentlemen, I thought I was tough and had a thick skin but, now you have penetrated my armor and I am vulnerable. Two years ago, I was on the Public Health and Public Morals Committee. I was not in favor of Naturopathy at first until I had studied the bill. Soon I became convinced that Naturopathy was good legislation. Then when they attacked Dr. Lunde on his personal character, I became his champion and the champion of Naturopathy. I abused Dr. Lunde, ordered him to stay out of the Capitol and out of the Amendment Clerk's office. I also became a proponent of the Basic science and passed the Basic Science Act. The doctors have been trying to pass the Basic Science Act since 1937. There was a deal made whereby if I passed Basic Science Act, Naturopathy would be signed first. I was double crossed.

"This year at the Public Health meeting Dr. Collette, of Elko, called us and said any persons who vote for Naturopathy are a bunch of murderers. Dr. Hovenden of Carson City, formerly of White Pine, said the Osteopaths and Chiropractors were a bunch of charlatans and intimated that anyone who voted for Naturopathy would be a charlatan. Mr. Ryan called him to order

and Mr. Mount threatened to have him thrown out of the committee room if he did not temper his remarks. Some of the amendments are puerile and inane, intended for one thing and one thing only, the complete eradication and destruction of Naturopathy.

"Now to Fish and Game; There is Fish and Game legislation and proposed legislation that will affect all of the sportsmen in your respective counties. They may even affect the economy of your respective counties and of the entire State.

"All members who would be interested in a Public Hearing will please see me on adjournment.

"Mr. Barr said he did not agree on holding open meetings for the Fish and Game Committee because nothing could be accomplished. Two years ago the Committee tried having open meetings and invited everyone interested in Fish and Game to come to the meetings, and as a result a great deal was said and afterwards the Committee still had to hold another meeting to make the decisions. Any member of the Assembly who is interested in Fish and Game is welcome at any of their meetings, the facts can be laid upon the table and the committee will decide to the best of their ability."

Mr. Higgins moved that the Assembly adjourn until Wednesday, February 25, 1953, at 10 a. m.

Motion carried.

Assembly adjourned at 3 p. m.

Approved: M. E. McCUISTION,
Speaker of the Assembly.

Chief Clerk of the Assembly.

Section 3. [The Justices of the Supreme Court shall be elected by the qualified electors of the State at the general election, and shall hold office for the term of six years from and including the first Monday of January next succeeding their election; provided, that there shall be elected, at the first election under this Constitution, three Justices of the Supreme Court, who shall hold office from and including the first Monday of December, A.D. eighteen hundred and sixty-four, and continue in office thereafter, two, four, and six years, respectively, from and including the first Monday of January next succeeding their election. Each Justice appointed hereunder shall hold office for a term ending December 31 following the next general election after the expiration of twelve months in the office. Any Justice holding office, or elected thereto, at the time election by which the provisions hereof become applicable to such office, shall, unless removed for cause, remain in office for the term to which he would have been entitled had the provisions hereof not become applicable to his office. Not less than sixty days prior to the holding of the general election next preceding the expiration of his term of office a Justice may file in the office of the Secretary of State a declaration of candidacy for election to succeed himself. If a declaration is not so filed by such Justice, the vacancy resulting from the expiration of his term of office shall be filled by appointment as herein provided. The Senior Justice in commission shall be Chief Justice and in case the commission of any two or more of the Justices shall bear the same date, they shall determine by lot who shall be Chief Justice. Whenever a vacancy shall occur in the office of Justice of the Supreme Court a nonpartisan judicial commission whose duty it shall be to nominate and submit to the Governor names of persons for appointment as herein provided, shall be established and shall be known as the Supreme Court Judicial Commission. The Commission shall consist of the Chief Justice of the Supreme Court, who shall act as chairman, the remaining Associate Justice or Justices of the Supreme Court, the President of the State Bar of Nevada, a public corporation, and other members chosen in the following manner: The members of the bar of this State residing in each Judicial District shall elect one of their number to serve as a member of said Commission, and the Governor shall appoint one citizen, not a member of the bar, from among the residents of each Judicial District. All such Commissions shall be administered, and all elections provided for under this Section shall be held and regulated, under such rules as the Supreme Court shall promulgate.

All expenses incurred in administering these provisions, when approved by the Supreme Court, shall be paid out of the State Treasury from funds not otherwise appropriated, in the manner provided by law for payment of claims against the State.

No Justice of the Supreme Court, appointed to or retained in office in the manner herein prescribed, shall directly or indirectly make any contribution to or hold any office in a political party or organization, or take part in any political campaign.

Mr. Baldy announced that we had the pleasure of having the students from the Carson City grammar school visit us today in the gallery and we should recognize their presence by a round of applause.

Mr. Rowntree explained his reason for voting in opposition to Assembly Bill No. 270, because the employees of the State of Nevada are still compelled to travel at the rate of 7½ cents per mile and he does not believe that the county employees should be allowed more than the State employees.

Mr. Crawford presented Mr. Speaker an enlargement of one of Ripley's "Believe It Or Not" cartoons concerning early legislation in Ancient Greece.

Mr. Rudiak made the following remarks:

"Mr. Speaker, and Members of the Assembly: It has come to my attention that certain remarks have been attributed to me in the morning edition of one of the Las Vegas newspapers, and although I have not seen the paper, the remarks as they have come to me lead me to believe that they are not true and correct statements of the remarks I made. Since I believe almost everyone of us, at one time or another, has been misquoted in the press, I think you will understand why I am making this statement here this afternoon.

"A statement appeared in the Sunday issue of the *Las Vegas Review Journal* attributing to certain members of the Legislature remarks that as a result of their trip to Basic plant they had reached the conclusion that an investigation of the Colorado River Commission was not in order, that all was well at the Basic plant and townsite, and that the Colorado River Commission had done a good job. Upon reading this article in the press, I felt—I don't know whether the gentlemen quoted made the remarks or not—that, bearing in mind that the managing editor of this paper is himself a member of the Colorado River Commission, this was something of an attempt to misuse the trip the members of the Legislature made to Clark County to whitewash the Colorado River Commission matter or to kill at least two pieces of legislation now pending before the Legislature. I stated to the press that I could not believe that any responsible legislator, bearing in mind that the Governor himself had asked for the investigation, would conclude on the basis of a two-hour trip through the plant, that no investigation was needed or necessary, and that I felt that certain special interests, and I don't mind telling you who they are, were misusing this trip for purposes of trying to improperly influence this Legislature. I said that I did not feel for one moment that any legislator had been or would be so influenced by this. If anything, quite the contrary; I have never doubted the integrity of this Legislature. There have been times when I have been in disagreement with some members of this body, but I have said before and will say again, that I have the highest opinion of the integrity of this Legislature, and that I do not believe that this body was influenced; I think the net result of this trip was quite the contrary. I know many of our legislators worked hard during the trip, our own special committee studying the Public Service Commission held several extended hearings; several of you visited the schools there to see the conditions there at first hand.

"I personally have no criticism to make of the Las Vegas Chamber of Commerce, which extended the invitation. I did not know until later that the expenses of this trip were actually borne by the gaming industry. I do seriously question the propriety and public morality of the gaming industry, or any other industry, with bills affecting such industry pending, extending such an invitation to a State Legislature and attempting to create an atmosphere which would make it difficult to pass such bills."

There being no objections, the Speaker and Chief Clerk signed

Assembly Bills Nos. 16, 61, 144, 145, 151, 162; Senate Bills Nos. 11, 65, 72, 84, and 86.

REMARKS FROM THE FLOOR

Mr. Crawford remarked that members of the Assembly were dissatisfied with the Rule Books. There may be those who want pictures and personal history in the said Rule Book, and such features do not appear in this said book. The State Printer has a number of these booklets without binding and there would be a very slight amount of additional work to insert pictures and personal history.

Mr. Ruedy called attention to names of various committees being incorrect.

Mr. Crawford moved that the Chief Clerk call the roll for those in favor of having pictures and personal history inserted in Rule Books, answer by "Aye" and those not in favor answer by "Nay."

Mr. Speaker announced that the best procedure would be for a resolution to be presented to have corrections made.

Mr. Crawford then withdrew his motion.

Mr. Speaker announced that if there were no objections, the Assembly would recess until 2 p. m.

MOTIONS, RESOLUTIONS, AND NOTICES

Mr. Speaker instructed the Chief Clerk to read the following communications:

WAR CLAIMS COMMISSION

WASHINGTON 25, D. C., March 3, 1953.

SPEAKER OF THE HOUSE, *Nevada State Legislature, Carson City, Nevada.*

SIR: On several occasions during the past two years the War Claims Commission requested and obtained great assistance from the Legislature of your State in distributing statements from the War Claims Commission to the Members of the Legislature. These statements dealt with the deadlines concerning certain benefits available to certain veterans and others.

Public Law 303, 82d Congress, 2d Session, approved April 9, 1952, provided a compensation of $1.50 per day for each day an American prisoner of war was subjected to certain violations of the Geneva Convention of 1929. This compensation is in addition to and on a different basis from the $1 per day allowed for food deficiency and hence must be specifically claimed. The deadline for filing for these benefits, which are available also to survivors of such veterans, is April 9, 1953. Enclosed are copies of a statement from the Commission relative to this matter, which may be of particular interest to the Members of the Legislature individually. The War Claims Commission will be grateful if you will have them placed on the Members' desks at your earliest convenience.

With best wishes, I am,

Sincerely yours,

F. BYRNE AUSTIN,
Executive Director.

WAR CLAIMS COMMISSION

WASHINGTON 25, D. C., March 3, 1953.

TO MEMBERS OF STATE LEGISLATURES:

In past years the War Claims Commission has had the privilege of writing to Members of the Legislatures with respect to the deadlines for filing claims under the War Claims Act of 1948 (80th Congress), as amended.

Public Law 303, 82d Congress, 2d Session, approved April 9, 1952, provided a compensation of $1.50 a day for each day an American prisoner of war was subjected to inhumane treatment and/or forced labor in contravention to the Geneva Convention of 1929, Respecting the Treatment of Prisoners of War. Survivors of such veterans, namely widows, children and parents, in that order, are also eligible under this law. The deadline for filing is April 9, 1953, and regardless of eligibility, claimants must file with the War Claims Commission on or before that date. This compensation is in addition to and on a different basis from the $1 per day compensation for food deficiency and hence must be specifically claimed.

The Commission is exceedingly desirous that all eligible veterans or their survivors who have not yet filed under Public Law 303 do so promptly. Being a small quasi-judicial independent agency with a limited staff, the Commission necessarily must seek the cooperation of others in making the deadline known as widely as possible to veterans or their survivors in your State. Claims forms for filing may be obtained from the War Claims Commission, Washington 25, D. C., State Veterans Agencies, Regional Offices of the Veterans Administration, the American Red Cross, and recognized veterans organizations.

Anything that you as a Member of your Legislature can undertake to do to make the approaching deadline known to the people in your State will be appreciated by American ex-prisoners of war and their families, as well as by the War Claims Commission.

With best wishes, I remain,

Sincerely yours,

F. BYRNE AUSTIN,
Executive Director.

SPECIAL ORDERS OF THE DAY

The hour of 2:03 p. m. having arrived, the report of the Special Committee to study the Public Service Commission was read by the Chairman, Mr. Rudiak:

REPORT OF SPECIAL COMMITTEE OF ASSEMBLY STUDYING PUBLIC SERVICE COMMISSION

Mr. Speaker:

Your Special Committee to Study the Public Service Commission unanimously begs leave to report as follows:

The present Public Service Commission, created under an Act approved March 28, 1919, has as its main purpose the regulation and supervision of the rates, fares, and services of all public utilities operating within the State of Nevada. In the performance of this duty, it supervises four railroads; the Pullman Company and Railway Express Agency, Inc; 35 water utilities; 26 utilities furnishing electricity or gas; 20 telephone or telegraph companies; two airlines; 120 intrastate common carriers; 116 intrastate contract carriers; and approximately 2,000 private carriers by motor vehicle.

In 1949, certain functions relative to motor vehicles, which had theretofore been administered, respectively, by the Secretary of State, acting as Motor Vehicle Commissioner, and by the Department of Highways, were transferred by statute to the jurisdiction of the Public Service Commission. By reason of this integration, the Public Service Commission, in addition to its primary regulatory activities with relation to public utilities, is now charged with the administration of the Drivers' License Division, the Safety and Safety-Responsibility Division, the Motor Vehicle Registration Division, and the Nevada Highway Patrol which enforces all traffic and motor vehicle laws upon the highways and carries on important revenue collecting functions under the Use Fuel Act and the Motor Carriers' Regulation and Licensing Act.

Within the time limitations imposed, your Special Committee investigated each of the major activities with which the Public Service Commission is charged. This involved an examination of existing laws under which the Commission and its several motor vehicle divisions operate; a survey and analysis of the minutes of all formal meetings of the Commission held between February 1949 and February 1953; a brief examination of the record of proceedings in the recently concluded Bell Telephone Company rate case; a statistical analysis of the relation between revenues produced by the several motor vehicle agencies of the Commission and the administrative costs of producing such revenues; and an examination and analysis of the proposed budget of the Commission for the 1953–1955 biennium.

In making its study, your Special Committee, or its individual members, interviewed several dozen witnesses informally and, in addition, conducted formal hearings in which the testimony of 25 witnesses was adduced under oath and recorded and transcribed. The recorded testimony of these witnesses has been filed with the Legislative Counsel and is available in his office for the information of any interested member of the Assembly. In the course of its hearings, the Committee interviewed the Chairman of the Public Service Commission on two separate occasions, and interviewed each of the other two Commissioners, the directors of the Nevada Highway Patrol, the Motor Vehicle Division, the Drivers' Registration Division and the Safety and Safety-Responsibility Division, as well as certain of the key personnel of the Commission, both past and present. In addition, the Committee interviewed the State Superintendent of Public Instruction, the State Highway Engineer, and the District Engineer of the United States Bureau of Public Roads in order to ascertain the relations of certain functions being carried on by the several motor vehicle agencies of the Commission to matters within the jurisdiction of these departments. Finally, in order to determine the effectiveness with which the Commission has been performing its primary function in the regulation of public utilities, your Committee interviewed three utility executives,

the mayors of two cities, a city attorney, the chairman of the Power Committee of the Las Vegas Chamber of Commerce, and several private citizens who requested a hearing.

On the basis of its study, your Special Committee has found the following facts and makes the following recommendations:

1. ORGANIZATION OF THE PUBLIC SERVICE COMMISSION

As presently constituted, the Public Service Commission consists of the State Engineer, who is an ex officio Commissioner; one full-time Commissioner, who receives a salary of $6,000 per annum; and one part-time Commissioner, who receives a salary of $3,000 per annum. The full-time and part-time Commissioners are appointed by the Public Service Board, consisting of the Governor, Lieutenant-Governor, and State Treasurer. The Commission elects its own Chairman, but, since neither the State Engineer nor the part-time Commissioner is able or required to devote his full time to the work of the Commission, the selection of the full-time Commissioner as Chairman is inevitable. The effect of having a Commission consisting of one elected member and two members appointed by the Public Service Board is to destroy the lines of responsibility. As a result, the Governor, having no direct control over the appointment of members of the Commission, has no direct control over the activities of the Commission and, therefore, cannot be held accountable by the public for the shortcomings of the Commission. The public is therefore deprived of any direct control over this all-important regulatory agency.

Although the present law requires that one of the Commissioners "shall be generally familiar with the operation of railroads" and that the third Commissioner "shall have a general knowledge of fares and freights and tolls and charges levied and collected by public utilities," there is little in the background of any of the present members of the Public Service Commission, other than experience which they may have acquired as members of the Commission, to evidence compliance with this requirement of the statute. The present Chairman and full-time Commissioner is a registered highway engineer and has a long background of experience as State Highway Engineer. The part-time Commissioner, who has served with the Commission since 1941, is engaged in business as an automobile dealer. The State Engineer has a distinguished background in hydrological engineering. Although the regulation of electrical, telephone and telegraph companies constitutes one of the most vital and technical phases of the Commission's activities, the Secretary of the Commission, who has been employed by the Commission for 20 years, and who is its chief administrative officer, but not a Commissioner, is the only staff member with a background in electrical engineering. This analysis of the background of the present personnel of the Commission is not to be construed as criticism of the qualifications or ability of any member of the Public Service Commission, but is intended to emphasize the practical difficulty of obtaining Commissioners having the qualifications prescribed by law at the rate of compensation allowed by law.

During the past four years, the Chairman has been present at only 70 percent, the part-time Commissioner at only 64 percent, and the State Engineer at only 32 percent of the days consumed in hearings before the Commission. So far as the Chairman is concerned, the explanation for this may be found in the manifold additional duties which he is required to perform under the existing plan of organization. Under the law, he must not only perform the functions of chief executive officer of the Public Service Commission proper, and of its motor vehicle divisions, but is also an ex officio member of the State Tax Commission. Although the only interest of the Chairman in the Tax Commission is in assisting to set the tax rates of the utilities under the control of the Public Service Commission, during 1952, 56 percent of the meeting days of the Tax Commission and nearly three weeks of the working time of the Chairman of the Public Service Commission were spent on gambling matters, in which the Chairman of the Public Service Commission has no interest. The State Engineer, for his part, testified before the Committee that

he is too burdened with the duties of the office to which he was appointed to be able to function effectively on the Commission. His training and experience, moreover, are helpful to the Commission only in connection with water utility matters, and in such matters could be made available to the Commission when needed even though the State Engineer were not a member of the Commission.

During the biennium, in the field of utility regulation alone, to say nothing of the administration of the motor vehicle agencies, the Commission received 175 complaints dealing with telephone, electric or water service or charges, investigated or held conferences relative to some of these complaints, and conducted 40 formal hearings, including five major rate cases, and acted upon 30 tariff cases. In addition, members of the Commission, sitting as joint board members in hearings before the Interstate Commerce Commission involving the regulation of motor vehicles in interstate commerce, attended 35 hearings on applications for motor vehicle certificates or permits. In view of the rapid growth of the State and the multiplying problems of obtaining adequate water, power, and telephone service to keep pace with such growth, and in view of the integration of the motor vehicle agencies in the Public Service Commission, the Committee has reached the conclusion that the Public Service Commission cannot function effectively in the public interest with one full-time and two half-time Commissioners, but that three qualified Commissioners are required to function on a full-time basis at an adequate compensation to attract men qualified to perform functions vital to the continued growth and prosperity of the state.

RECOMMENDATIONS

By reason of the foregoing facts, the Committee recommends that the Public Service Commission be reorganized on the following basis: That the Public Service Board be abolished and that the Governor appoint three full-time Commissioners, for a term of four years each, on a staggered basis. One of the Commissioners shall be experienced in the field of electrical engineering or utilities, and one shall be experienced in the field of railroads and transportation. That, from their own number, the Commission shall elect a Chairman who shall be the administrative head in charge of all activities of the Commission except the motor vehicle agencies, and a Vice-Chairman who shall be the Commissioner of Motor Vehicles and the administrative head of all the motor vehicle agencies. The third Commissioner shall assist the Chairman in his administrative duties, but shall have equal powers and responsibilities with the other two Commissioners in all matters upon which the Commission shall act as a board. The salary of each of the Commissioners shall be $7,200 per annum. The State Engineer shall be relieved of his duties as a member of the Commission. That the Commission shall elect from its own number a Commissioner to sit as ex officio member of the Tax Commission.

2. DISTRIBUTION OF TECHNICAL AND LEGAL COSTS

The difficulty of attracting to the Commission, even at the increased salaries recommended, personnel fully qualified as experts in the field of utility regulation, makes it imperative that the Commission be furnished with sufficient funds to enable it to retain engineers, auditors, rate experts, and attorneys specializing in utility matters, upon a per diem or case basis, to make preliminary investigations, furnish expert testimony, and otherwise assist and advise the Commission in the more important cases involving rates or service.

During the past four years, protestants of proposed new rate schedules, curtailments or modifications of service, and the like, were present at only approximately 70 percent of hearings held before the Commission. In very few of these instances were the protestants represented by attorneys or were they able to present expert testimony to off-set the highly paid and specialized attorneys and experts employed by the utilities. As a result, the inference is inescapable that in most of these cases, only one side of the case was fully presented to the Commission. Only in cases in which a municipality, a civic body, or a publicly operated utility has intervened in proceedings pending before the Commission, has a substantial investment in legal and technical talent

been made on behalf of the public. Thus, the Mineral County Power District in resisting a proposed 25 percent increase in power rates proposed by the California-Electric, from which the Power District purchases its power, spent approximately $5,000 in fighting the increase before the California Public Utilities Commission and in the courts. The city of Las Vegas, in cooperation with the Las Vegas Chamber of Commerce, has spent approximately $10,000 for technical advice in resisting an increase in water rates, in seeking improvement of water service, and in resisting a ban on electric space heating.

When such technical assistance has not been volunteered by a public body, however, the Commission has been obliged to rely upon its own resources, and has usually lacked sufficient budgeted income. Thus, by its own admission, the Commission's auditor has been too occupied with the problems of auditing revenues produced by the several motor vehicle agencies, to be able to devote time to the auditing of the accounts and capital structures of the utilities regulated by the Commission, although the rates of such ulitities are based upon such capital structures. The lot of making an accounting analysis of the financial statements and balance sheets of the utilities has fallen upon the Chairman of the Commission who is not an accountant. The Attorney General and the District Attorneys, who are charged by law, with representing the Commission in court cases involving rates and service, have cooperated to the best of their ability, but have also been handicapped by lack of technical assistance, advice, investigation, and testimony in this highly intricate and technical field. So far as the Committee has been able to ascertain, during the past biennium, the Commission procured technical advice and testimony, at an expenditure of several hundred dollars, in only one instance, namely, the recently concluded and important Bell Telephone Company rate case. In this instance, although the Commission made an undoubted effort to protect the public from a rate increase, the technical case which it was able to present to the courts with its limited financial resources, was overwhelmed by technical testimony and exhibits adduced by the utility physically occupying a complete filing cabinet drawer of space. In view of this disparity, the reversal of the Commission's order by the Supreme Court was virtually inevitable.

It should be borne in mind in this connection, that while the Commission is maintained upon a starvation budget in so far as technical aid is concerned, the utilities actually pass on the cost of the highly-paid legal and technical experts who represent them to the public, since such expenditures are charged off by utilities as operating costs and therefore enter into the fixing of the rate which the public is required to pay to the utilities.

In view of these considerations, the State of Oregon has long required each utility to pay 2 percent of its net income into a special fund for the support of the office of Commissioner of Public Utilities. At least one utility company executive, interviewed by the Committee, has indicated that his company would be willing to pay all or part of the technical and legal costs of the Commission, at least in any proceeding initiated by such utility. The Commission has requested a budget of $14,000 for the coming biennium to meet the anticipated costs of technical investigations. In view of the rapid growth of the State and the many pressing and unsolved utility problems to which the Commission will fall heir during the next biennium, the Committee is of the opinion that such budget will only be adequate if supplemented by a legal requirement that each utility, in every proceeding calling for an investigation or formal hearing by the Commission, shall contribute one half of the Commission's costs of technical investigation, advice and testimony. The requirement that the utility advance such costs should have a deterring effect in discouraging the utility from making successive requests for reconsideration as was done in the Las Vegas Land and Water Company rate case, in which the utility, through successive applications, was able to win approximately a 30 percent rate increase of the 42 percent rate increase requested. At the same time, the requirement that the Commission pay one half the expense of technical investigation should tend to encourage the Commission not to incur needless expense for such purposes.

RECOMMENDATIONS

In view of the foregoing facts, the Committee recommends that the Commission's request for a $14,000 budget for technical assistance in rate and service cases be honored; that all utilities be required by law to pay to the Commission on demand one half of all the technical and legal costs incurred in any investigation or formal hearing conducted by the Commission in any matter relating to rates or service, irrespective of whether such proceeding be initiated by the utility, a user, or the Commission on its own motion; that before rendering its decision or order after any formal hearing, the Commission make available to each Commissioner a full transcript of the proceedings had before it; that at the request of the Attorney General, the Commission shall allocate to the Attorney General, or to a District Attorney representing the Commission in any utility rate or service matter pending in the courts, sufficient funds to enable the Attorney General or such District Attorney to retain and associate counsel especially skilled in the handling of utility matters.

3. RESTRICTION AGAINST EX PARTE ORDERS

Section 25 of the Public Service Commission Act requires that whenever any interested municipality or person shall complain to the Commission that any rates or regulations are unreasonable or discriminatory, or that any service is inadequate, the Commission shall investigate such complaint with or without notice, and if it finds probable cause for such complaint to exist, that it shall order a hearing upon notice to both the utility and the complainant.

Under Section 27 of the Act, the Commission is empowered to make a similar investigation upon its own motion, without complaint, and after a full hearing upon notice, to make such changes as may be just and reasonable.

Section 36½ of the Act makes it unlawful for any public utility to discontinue, modify, or restrict service to any city, town, municipality, community, or territory theretofore serviced by it, except upon 20 days' notice filed with the Commission and upon order of the Commission made after hearing.

Under Section 32 of the Act it is provided that all rates, fares, charges, classifications and all regulations, practices and services prescribed by the Commission shall be enforced until "changed or modified by the Commission itself upon satisfactory showing made" or by the court in proceedings brought under Section 33.

Section 2 of the Act provides that the majority of the Commissioners shall have full power to act in all matters within their jurisdiction, and that action by a single Commissioner shall be authorized only when two vacancies exist on the Commission or two of the Commissioners are disqualified to act.

In spite of these plain provisions of the statute, in several instances, which have come to the attention of the Committee, the Commission, sometimes by action of a single Commissioner, has made orders upon the ex parte application of the utility, affecting the substantial rights of the public, without notice to the public or formal hearing; nor has the Commission always pursued vigorous action to enforce compliance with its orders. Thus, bus service to a section of the city of North Las Vegas, according to one witness, was curtailed without notice or hearing by action of the Chairman upon the plea of the bus company that the street was impassable by reason of sewer improvements, but, although the street affected was originally graveled, the order authorized the bus company to suspend service until it should be paved. So, too, without previous notice to the public or hearing, the Commission authorized the Southern Nevada Power Company to impose a ban upon electric space heating on all new construction in Clark County. After protest by the city of Las Vegas, the Las Vegas Chamber of Commerce, numerous contractors, and approximately 3,500 citizens, this ban was withdrawn and replaced by a requirement for the installation of electric load regulators. The effect of the original order, was to disorganize and delay several large housing subdivisions then planned or in process of construction. The effect of the order for installation of load regulators has been to cause the Federal Housing Administration to refuse to insure mortgage loans upon homes in

which load regulators are to be installed, to some extent impairing home financing in Southern Nevada. Concurrently with the last-mentioned order, the Commission ordered the utility to develop or find new sources of power within the next three years. But although approximately one year has passed since the making of the order, and although the executives of the utility testified that should the company decide to install a steam-generating plant, it would take approximately three years to complete the purchase and installation of such new power generating equipment and power lines, the company executives admit that no orders have yet been placed for such equipment. The company is apparently reluctant to make a large capital investment in a new plant, particularly in view of the greater cost which would be entailed in distributing steam-generated power, and is placing its chief reliance upon the hope that present negotiations being carried on by the Colorado River Commission will result in acquisition of additional power for the State of Nevada which can then be purchased by the utility from the Colorado River Commission to supplement its present supply. Although at this time the ability of the Colorado River Commission to augment its power capacity remains conjectural, the Public Service Commission has given no evidence that it has in any way implemented or intends to implement its order requiring the development of additional power sources by the Southern Nevada Power Company within the next three years. In view of the rapid growth of Southern Nevada, and barring the mere possibility that the negotiations of the Colorado River Commission will prove successful, there is no reason to believe from the evidence presented that the Southern Nevada Power Company will be in a better position to meet the power needs of the community two years hence than it is today.

Again, by way of example, although the Commission, after numerous complaints of the inadequacy of telephone service in Southern Nevada, ordered the Southern Nevada Telephone Company to install an automatic dial telephone system and to place its orders for the purchase of equipment by a specified date, upon informal application of the telephone company, and without notice to the public, or hearing, the Commission extended by 90 days the time within which the utility should be required to place its purchase orders. Conceivably, the time for installation of an automatic dial telephone system could be indefinitely postponed by a series of such ex parte orders. Similarly, although the Las Vegas Land and Water Company, after hearings held more than two years ago, was required to improve its service and although certain improvements such as the cleaning out of pipes and installation of pumps were made, Las Vegas officials express the fear that these measures will not prove adequate and that a further water shortage impends this summer. The net result to the users has been a 30 percent increase in water rates without a corresponding improvement in service.

Since a public utility, in order to be free of ruinous competition, must by its very nature operate upon an exclusive or monopolistic basis, the interest of the public in securing adequate service from such utility at reasonable and nondiscriminatory rates, must necessarily be protected by a Public Service Commission eternally vigilant to protect the public interest. To protect the public interest effectively, such regulatory body must of course be adequately staffed and financed. But the proper protection of the public involves not only adequate personnel and budget, not only the prompt, diligent, and thorough investigation of complaints, not only full and fair hearings after public notice, but also a continuing spirit of initiative upon the part of the Commission.

The Commission, upon its own motion, must continuously anticipate the utility needs of every growing community in the State, and must use every fair and reasonable means to encourage the utilities to improve their service and to meet anticipated needs. The Commission must not confine itself to fighting a rear-guard action to keep down rates in an era of rising costs, but must plan with vision and lead with vigor in solving the utility problems of a fast developing State. Such initiative and leadership has not always been manifested by the Public Service Commission.

RECOMMENDATIONS

The Committee recommends that the Public Service Commission Act be amended to prohibit the Commission from issuing any orders modifying rates, curtailing service or facilities, or abrogating or modifying any order previously made by the Commission after hearing, except upon personal notice to the Complainant and the Utility and notice to the public given by publication in the press, and prohibiting ex parte orders by the Commission except in cases in which the Commission shall unanimously adopt and enter upon its minutes a finding of facts establishing the existence of an emergency warranting the issuance of such ex parte order, and provided that notice of the making of such order shall immediately be given to the public by publication in the press.

4. INTEGRATION OF SAFETY AND SAFETY-RESPONSIBILITY DIVISION WITH DRIVERS' LICENSE DIVISION

The Drivers' License Division of the Public Service Commission issues, renews, suspends, and revokes drivers' licenses as a safety measure. Related, and to some extent duplicating functions, are carried on by the Safety and Safety-Responsibility Division, which collects and compiles statistics based on accident reports, carries on certain activities connected with driver education, and administers the Motor Vehicle Safety-Responsibility Act of 1949 under which drivers' licenses may be suspended or revoked for failure of a driver involved in an accident to show financial responsibility. The collection and compilation of accident statistics is largely a clerical function which in the opinion of the Committee could be advantageously handled by a clerk in the Drivers' License Division, with the added advantage that the accident reports would be available in the same office for posting to the records of the individual drivers. Similarly, having the Safety-Responsibility reports submitted to the Drivers' License Division would enable the same department which now suspends or revokes licenses for drunk and reckless driving and other moving vehicle violations to suspend and revoke licenses for noncompliances with the Motor Vehicle Safety-Responsibility Act.

By an opinion dated October 16, 1951, the Attorney General ruled that the State Board of Education was authorized to appoint a Supervisor of Driver Training in the Public Schools. Pursuant to this ruling, on November 15, 1951, the Nevada State Board of Vocational Education appointed F. I. Wallace as supervisor of driver education and training classes for high school students. Since that date a driver education program has been carried on under the supervision of Mr. Wallace through high school instructors for whom such driver training constitutes a secondary assignment. Duplicating coordination of these activities has been carried on to some extent by the Director of the Safety Division, whose most active work, however, has been confined to coordination with the instructors responsible for these programs in the Reno, Sparks, Yerington, and Fallon areas. The Director of the Safety Division has also organized, but has not personally taught, the summer session classes at the University of Nevada given for the benefit of instructors operating under the high school driver training program. The evidence shows that Mr. Wallace is fully qualified to assume this function. Since actual instruction is carried on by personnel of the high school teaching staffs, and since little assistance can be given to these programs by the Director of the Safety Division which cannot be supplied with equal or great facility by the local school principals with the aid of the State Supervisor of Trade and Industrial Education, the Committee sees no purpose in the continuance of this duplicating function by the Safety Division. Similarly, as the Director of the Division admitted, the function of organizing and supervising Junior Traffic Patrols is primarily a local school problem to which the Safety Division can lend little assistance.

RECOMMENDATIONS

The Committee recommends that the Safety and Safety-Responsibility Divisions be merged with and become part of the Drivers' License Division;

that the driver training and junior traffic patrol activities be entrusted completely to the jurisdiction of the Nevada State Board of Vocational Education; that all local peace officers and judicial authorities be required to submit to the Drivers' License Division, reports of all convictions for moving vehicle traffic violations; that the two-year birthday operator's license renewal plan be adopted in order to stagger the renewal load in the Drivers' License Division.

CONCLUSION

Based upon evidence encountered in its study, your Committee makes the following additional recommendations:

1. That the State Highway Patrol be expanded to a total of 41 members. It is believed that the more effective collection of motor vehicle carrier licenses and enforcement of motor vehicle registration laws and weight limit laws which will be made possible by such expansion will more than pay for the costs involved.

2. That the motor vehicle registration laws as set forth in Section 4435.10, N.C.L. 1931–1941 Supplement, be amended to do away with temporary certificates of registration and to provide for issuance of permanent certificates of registration by the County Assessors, and that the County Assessors be allowed an additional 25 cents per license for such services; that consideration be given to reduction in the staff of the Motor Vehicle Division commensurate with the work which will be saved by such decentralization.

3. That the Ways and Means Committee give special attention to the proposed allotment of certain sums from the State Highway Fund for the operation of the Public Service Commission proper to determine how much of such diversion can properly be justified without jeopardizing Federal funds received under the Federal-Aid Highway Act. A special report is being submitted to the Ways and Means Committee relative to this and other budgetary matters noted by your Committee.

4. That the Legislative Counsel Bureau be memorialized to prepare, during the next biennium, a study to determine the advisability of applying the provisions of the Federal Administrative Procedures Act of 1946 to guide the procedure at hearings before the Public Service Commission and all other Statewide licensing or regulatory agencies.

Bills to implement the recommendations of your Committee are being prepared for introduction at this session of the Legislature.

Respectfully submitted this 9th day of March, 1953.

MOTIONS, RESOLUTIONS, AND NOTICES

By the Special Committee to study the Public Service Commission:

Assembly Resolution No. 32—Accepting and approving the report of the Special Assembly Committee appointed to study the Public Service Commission of Nevada.

WHEREAS, The Special Committee of this body was appointed to investigate the activities of the Public Service Commission of Nevada; and

WHEREAS, The report of the said Committee was this day made to the Assembly; now, therefore, be it

Resolved by the Assembly of the State of Nevada, That the aforesaid report of the Special Assembly Committee on the activities of the Public Service Commission of Nevada is hereby approved, accepted, and the State Printer is hereby directed to print 100 copies of the report; and be it further

Resolved, That a copy of the report be transmitted forthwith by the Clerk of the Assembly to the Senate of the State of Nevada.

Mr. Rudiak moved the adoption of the resolution.

Remarks by Mr. Reynolds:

"I do not agree that the member of the Tax Commission be a member of the Public Service Commission. I think that there should remain three commissioners, one of them to continue to serve on the Tax Commission. I refer to the statement of the witness as stated in the report as to the discontinuance of the bus service until the street was paved. The truth of the matter was that statement was 'until the street was repaired.'"

Remarks by Mr. Swackhamer:

"The report as read is very comprehensive and I would not care to accept the report until I have had opportunity to read same, and I believe this would be the same thought of many of the Assemblymen."

Remarks by Mr. Von Tobel.

"Each individual member will be given the opportunity to express approval or disapproval. This resolution is just to accept the report as given and does not commit members to acceptance of recommendations."

Resolution adopted.

COMMUNICATIONS

The Speaker instructed the Chief Clerk to read the following communication:

STATE PRINTING OFFICE
OF NEVADA
CARSON CITY

March 6, 1953.

HON. DON CRAWFORD, *Nevada Legislature, Carson City, Nevada.*

DEAR DON: Thanks very much for the information concerning the attitude of members of the Assembly relative to the Legislative Handbook.

In 1949 and 1947 I included pictures and biographies of members of the Legislature in the handbook, on my own initiative, this having never been done previous to that time. In 1951 the Legislature made what I consider very necessary and desirable changes in the laws regulating the operation of the printing office. However, as the law now stands the printer must have specific authorization before he can do any particular job of printing. This was the case with the individual letterheads for the members which was handled by your committee. It also applies to the pictures in the handbook. I would be more than glad to proceed with the work on receipt of the authorization. This, I believe, should be in the form of a resolution authorizing the necessary expenditure, and such a resolution should also provide for the printing of the handbook for the 1955 session. It might be that a motion to request the Legislative Functions Committee to have the work done would be sufficient.

Envelopes and all other work is printed in accordance with copy prepared by the proper officials. The printer has nothing to do with the choice of wording used.

Please be assured of my appreciation of your interest in this matter and also of my full cooperation.

Very truly yours,

JACK MCCARTHY, *State Printer.*

MOTIONS, RESOLUTIONS, AND NOTICES

By Mr. Crawford:

Embry and Reynolds are therein set forth as members of said committee when in fact the Messrs. Embry and Reynolds are not members of said committee, and in that the names of Messrs. Palludan and Robins are not therein set forth as members of said committee when in fact the Messrs. Palludan and Robins are members of said committee; and

WHEREAS, In previous issues of the Handbook of Nevada Legislature it has been the practice to include photographs and biographical sketches of members of the Legislature; and

WHEREAS, The inclusion in the Handbook of Nevada Legislature of photographs and biographical sketches of members of the Legislature has been a great convenience to members of the Legislature and other interested persons; now, therefore, be it

Resolved by the Assembly of the State of Nevada, That the Superintendent of the State Printing Office of the State of Nevada be, and he hereby is, authorized and instructed to change page 31 of the Handbook of Nevada Legislature, 46th Session, 1953, to correctly reflect the composition of the Assembly Committee on Ways and Means by deleting therefrom the names of Messrs. Embry and Reynolds and substituting therefor the names of Messrs. Palludan and Robins; and, be it further

Resolved, That the Superintendent of the State Printing Office of the State

of Nevada be, and he hereby is, authorized and instructed to add to the Handbook of Nevada Legislature, 46th Session, 1953, photographs and biographical sketches of all members of the Assembly who desire to have their photographs and biographical data included therein.

SPECIAL ORDERS OF THE DAY

VETO MESSAGES OF THE GOVERNOR

Vetoed Assembly Bill No. 58 of the Forty-sixth Session.

Bill read.

Governor's message stating his objections read:

STATE OF NEVADA
EXECUTIVE CHAMBER

CARSON CITY, February 27, 1953.

HONORABLE CLIFFORD A. JONES, *President of the Senate, Senate Chambers, Carson City, Nevada.*

DEAR SIR: There is hereby returned to your Honorable Body, within the constitutional time limit and without my approval Senate Bill No. 58, introduced by Senator Lemaire on February 5, 1953, and entitled, "An Act to amend an Act entitled, 'An Act providing for the removal from office of public officers for malfeasance or nonfeasance in office, regulating the mode of procedure, and other matters properly connected therewith,' approved March 24, 1909, as amended."

This bill has not been approved by me for the following reasons: It amends the original Act of 1909, being Section 4861 of the Nevada Compiled Laws providing for the removal of public officers from office for malfeasance or nonfeasance in office and providing the procedure therefor. The amendment concerns itself with the procedure to be followed when the charge is made against a District Judge. In my opinion the original Act, in view of a prior judicial opinion of our Supreme Court, see State v. McClinton, 5 Nev. 329, was not intended to, nor did it, contemplate the removal of District Judges in the manner provided for in the section above referred to.

Article VII, Section 3, of the Constitution of the State of Nevada, specifically provides for the impeachment of the Supreme Court and District Judges. They may be removed from office only by a two-thirds vote of each branch of the Legislature.

In the case of State v. McClinton, 5 Nev. 329, the court pointed out that Section 4 of Article VII was to the effect that:

> Provision shall be made by law for the removal from public office of any civil officer other than those in this article previously specified, for malfeasance or nonfeasance in the performance of his duties.

Section 3 of the same article provides for the removal of judges by impeachment. The Court held it to be the clear intent of the constitutional framers that the method of impeachment provided for in Article VII, Section 3, was the sole and exclusive method of removing judges from office. On this point the Court said:

> That there is a lack of judicial interpretation of, or decision upon their meaning or effect (similar provisions), must be attributed to the fact that the same is clear and evident. When called in question, however, they (similar provisions) have been held to be exclusive and prohibitory upon the Legislature against the employment of other means for the removal of officers within their purview.

For the reasons herein set out Senate Bill No. 58 is deposited without my approval.

Very respectfully yours,
CHARLES H. RUSSELL, *Governor.*

MOTIONS, RESOLUTIONS, AND NOTICES

Mr. Waters moved that Assembly Bill No. 248, now on General File for third reading and final passage, be indefinitely postponed.

Remarks by Messrs. Rudiak, Ryan, Reynolds and Mrs. Denton.

Messrs. Ryan, Beko and Byrne requested a roll call vote on Mr. Waters' motion.

Mr. Speaker ruled that a majority of those present as determined by the morning roll call would be considered the "majority."

Mr. Ryan made the following remarks:

"It is important to answer morning roll call, and to report present when one had been absent at morning roll call. There are those present at morning roll call, then absent themselves later when vote is to be taken. My reason for wishing to clarify this is the question of majority voting and the majority of roll call. Mr. Speaker has given certain rulings. A quorum present is necessary to conduct all business of the Assembly, a majority of that quorum should be sufficient but I feel if we are going to be absent from this voting, we should be compelled to substantiate by two-thirds vote the absence of any member, and members present should vote 'yea' or 'nay.' I have no objections to the rulings of the Speaker previously, but a majority of the quorum present should be sufficient in this instance, and in order that we may know where we stand from now until the end of the sessions, let Mr. Speaker give the decision on meaning of 'majority.' "

Mr. Rudiak appealed the ruling of the chair and remarked he understood it was the majority of those elected, necessary to sustain the vote.

Remarks by Messrs. Wood, Reynolds, Castle, Rudiak, Ryan and Rowntree.

Mr. Rudiak withdrew his appeal on the decision of the Chair.

Mr. Speaker announced that Section 435, page 225, of Mason's Manual, to indefinitely postpone required a majority of those members voting.

Mr. Rudiak remarked:

"I want this recorded in the Journal. My sole reason for changing my vote from nay to yea was for the purpose of giving notice to reconsider the motion."

Mr. Rudiak gave notice that on the next Legislative Day he would move to reconsider the motion to indefinitely postpone.

"SEC. 3. There is hereby created in the State Treasury, for the use of the Nevada State Planning Board in carrying out the provisions of this Act, a trust fund to be known as the 'Jot Travis Student Building Construction Fund.'

"SEC. 4. To provide said Jot Travis Student Building Fund in the State Treasury, the Governor, Secretary of State and Attorney General of the State of Nevada are hereby constituted a commission and are hereby authorized and directed to issue bonds of the State of Nevada as and when needed in a sum not to exceed $300,000. Said bonds shall be in denominations of $5,000, each payable in legal tender of the United States and shall be numbered serially, and when retired shall be retired in the order of their issuance. Such bonds shall be signed by the Governor and endorsed by the Secretary of State and the Attorney General, countersigned by the State Controller and authenticated by the great seal of the State of Nevada. Said bonds shall bear interest at the rate of not more than 3 percent per annum. Said rate of interest shall be fixed by said commission, and payable semiannually, that is to say, on the first day of January and the first day of July of each year, the first payment thereof to be made on the first day of January 1954; and said bonds shall be

redeemed and paid within 20 years from the date of the passage of this law.

"SEC. 5. The funds in the said Jot Travis Student Building Fund in the State Treasury shall be used solely for the purpose of providing funds which may be necessary to equal any sums received from the estate of the late Wesley Elgin Travis for the purpose of the construction on the campus of the University of Nevada at Reno, Nevada, of a building to be known as the Jot Travis Student Building.

"SEC. 6. The President and Regents of the University of Nevada are hereby authorized and empowered to accept, on behalf of the University of Nevada, bequests, gifts or other donations of money or property from the estate of Wesley Elgin Travis, deceased, and from any other source whatsoever, for the purpose of the construction of the said Jot Travis Student Building. All such funds so received by the President and Regents of the University of Nevada shall forthwith be deposited in the State Treasury to the credit of the Jot Travis Student Building Construction Fund. Whenever any funds are received from the estate of Wesley Elgin Travis, deceased, and deposited to the credit of the Jot Travis Student Building Construction Fund, the State Controller shall forthwith transfer from the Jot Travis Student Building Fund to the Jot Travis Student Building Construction Fund funds equal to the amount of funds so received from the estate of Wesley Elgin Travis, deceased.

"SEC. 7. None of the funds in the said Jot Travis Student Building Fund, and none of the funds in the said Jot Travis Student Building Construction Fund, shall be used for any purpose or purposes other than to construct on the campus of the University of Nevada at Reno, Nevada, a building to be known as the Jot Travis Student Building for use by the students of the University of Nevada for recreation purposes and containing suitable offices for bona fide student organizations and offices for the Alumni Association.

"SEC. 8. The Nevada State Planning Board is hereby charged with the duty of carrying out the provisions of this Act relating to the construction of the said Jot Travis Student Building. The State Planning Board shall employ competent architects, who in turn shall employ competent structural and mechanical engineers in preparing plans and specifications. The State Planning Board shall advertise in a newspaper of general circulation in the State of Nevada for separate sealed bids for construction of said building. Approved plans and specifications shall be on file at a place and time stated in said advertisements for the inspection of contractors desiring to bid thereon, and for others interested in the matter. The State Planning Board may accept bids on either the whole or on a part or parts of said construction, and may let a contract for the whole thereof, or separate contracts for different and separate portions thereof, or a combination contract for structural, mechanical and electrical construction if savings will result thereby, at their discretion, to the lowest qualified bidder thereon; provided, that any or all bids for any good reason may be rejected.

"All sealed bids shall be accompanied by a bidder's bond of 5 percent

of the amount of the bid; the bid shall further show the Nevada State contractor's license number of the bidder. If such license number is not so enclosed with the bid, said bid shall be rejected. A completion bond for the full amount of the contract shall be furnished by the successful bidder. The time limit covered by such completion bond shall be set by the architect, and based upon standard practice for such work, with the proper penalty therein provided. No exception or extension of time shall be permitted that may be caused by the unavailability of materials. There shall be no substitution of types and qualities of materials normally used in such construction because of the unavailability of materials.

"SEC. 9. The State Planning Board shall pay the compensation of architects at the time of acceptance of the plans and specifications prepared and presented to the board or thereafter, in full or in part, as provided for in the agreement between the board and the architects for the preparation and presentation of said plans and specifications. All bills for the employment of architects or for the work herein provided for shall be paid out on claims against the Jot Travis Student Building Construction Fund as other claims against the State are paid, and such claims, before payment, shall first be approved by the chairman and the secretary of the State Planning Board.

"SEC. 10. The President and Regents of the University of Nevada and the State Planning Board shall cooperate in carrying out the provisions of this Act. All plans and specifications and contracts for the whole or part or parts of said construction shall be approved by the Regents of the University of Nevada before any construction may begin.

"SEC. 11. Upon completion and final acceptance of said building and payment therefor, the Jot Travis Student Building Fund and the Jot Travis Student Building Construction Fund shall terminate and any unexpended or unobligated balance or balances remaining in either or both of said funds in the State Treasury shall be paid into the Consolidated Bond Interest and Redemption Fund of the State of Nevada, under the provisions of Chapter 197, Statutes of Nevada 1939, and disbursed as provided therein for the purpose of the payment of interest and redemption of bonds issued according to the provisions of this Act.

"SEC. 12. Upon the issuance and execution of said bonds the same may be sold and delivered to the State Permanent School Fund, Teachers' Retirement Fund, University 90,000-Acre Grant Fund, the University Seventy-Two Section Grant Fund, the State Insurance Fund of the Nevada Industrial Commission and such other State funds as may have money available for legal investment in such bonds as moneys may be available in the State Treasury for said bonds, or either or any of them, without advertising said bonds for sale or calling for bids thereon.

"If such money be not available in any or all of said funds the bonds herein provided for may be sold as needed for the purpose herein stated at public or private sale as said board may deem for the best interests of the State. Said bonds shall be sold at not less than par,

and the proceeds thereof shall be placed in a fund to be known as the Jot Travis Student Building Fund, and shall be so issued and sold only as and when needed. At least one of said bonds of $5,000 each shall be redeemed on each of said interest paying dates for the payment of such interest, as provided herein, and to be specified in said bonds for the payment of said interest commencing on January 1, 1954, provided, all said bonds shall be redeemed and paid within 20 years from the date of the passage of this Act. "With reference to the bill we have just passed in consideration of the late Wesley Elgin Travis I would like to point out that this man, originally a resident of this State of Nevada, is and has been a great character who has always made reference to 'the most sound State in the Union.' That there will be at least as much more money coming from the estate than was required to be matched by this bill, and I think that this man certainly, by the terms of his will, has been most generous and has seen to it that a considerable portion of his very large estate has been given to the University for its needs and its cost, and also that the balance of moneys that may come from his estate do not require any matching moneys by this Legislature."

The following Senate amendment was read:

Amend the bill by adding a new section to be known as Sec. 2, and to read as follows:

SEC. 2. Section 7 of the above-entitled Act being Section 2825.07, 1929 N.C.L. 1941 Supp., as amended by Sec. 10 of chapter 223, 1951 Statutes of Nevada, is amended to read as follows:

Section 7. (a) Payment. (1) On and after January 1, 1937, contributions shall accrue and become payable by each employer for each calendar quarter in which he is subject to this Act, with respect to

wages payable for employment occurring during such calendar quarter; provided, that such contributions shall not accrue and become payable with respect to that part of the remuneration which, after remuneration equal to [three thousand dollars ($3,000)] *$3,600* becomes payable to an individual by an employer with respect to employment during and for any calendar year, becomes payable to such individual by such employer with respect to employment during the calendar year 1947, and during each calendar year thereafter; provided, however, if the Federal Unemployment Tax Act is amended to apply to a higher amount than the first [three thousand dollars ($3,000)] *$3,600* of wages, then such higher amount shall likewise apply, as a substitute for the amount herein specified, starting with the same period to which such Federal amendment first applies. Such contributions shall become due and be paid by each employer to the executive director for the fund in accordance with such regulation as the executive director may prescribe, and shall not be deducted, in whole or in part, from the wages of individuals in such employer's employ.

(2) In the payment of any contributions, a fractional part of a cent shall be disregarded unless it amounts to one-half cent or more, in which case it shall be increased to one cent.

(b) Rate of Contribution. Each employer shall pay contributions equal to the following percentages of wages payable by him with respect to employment:

(1) One and eight-tenths per centum with respect to employment during the calendar year 1937;

(2) With respect to employment after December 31, 1937, two and seven-tenths per centum, except as otherwise prescribed in subsection (c) of this section.

(c) Future Rates Based on Benefit Experience. The executive director shall, for the period of six months commencing July 1, 1945, and for the calendar year commencing January 1, 1946, and for each calendar year thereafter, classify employers in accordance with their actual payrolls, contribution, and benefit experience, and shall determine for each employer the rate of contribution which shall apply to him throughout the six months' period commencing July 1, 1945, and for each calendar year thereafter, in order to reflect said experience and classification. In making such classification, the executive director shall take account of the degree of unemployment hazard shown by each employer's experience, and of any other measurable factors which he finds bear a reasonable relation to the purposes of this subsection. Benefits paid to an individual since January 1, 1939, shall be charged against the accounts of his employers, as the executive director may by regulation prescribe; provided, that no augmentation of benefits paid by reason of the fact that a claimant has dependents shall be charged to any employer's account. Such rates shall be computed on the payroll, contribution, and benefit experience of the employer for not less than thirty-six consecutive calendar months immediately preceding the computation date, which date shall be not more than twenty-

seven weeks prior to the effective date of the new rate. He may apply such form of classification or rating system which in his judgment is best calculated to rate individually and most equitably the employment risk of each employer and to encourage the stabilization of employment. The general basis of classification proposed to be used for any calendar year shall be subject to fair notice, opportunity for hearing and publication. The executive director shall determine the contribution rate applicable to each employer for any calendar year subject to the following limitations:

(1) Each employer's contribution rate shall be $2\frac{7}{10}$ per centum, unless and until there shall have been thirty-six (36) consecutive calendar months immediately preceding the computation date of the new rate, throughout which his account as an employer could have been charged with benefit payments.

(2) Each employer eligible for a rate based upon experience and classified in accordance with this section shall be assigned a rate by the executive director for the calendar year commencing January 1, 1949, and for each calendar year thereafter, according to the following classes: class 1, 0.10 per centum; class 2, 0.05 per centum; class 3, 1.0 per centum; class 4, 1.5 per centum; class 5, 2.0 per centum; class 6, 2.7 per centum. No employer's rate shall be varied below the 2.7 per centum rate unless, as of the preceding January 1, the total amount available for benefits in the Nevada Unemployment Compensation Fund equals or exceeds 1.5 per centum of the total payrolls subject to contributions under the Nevada Unemployment Compensation Laws for the five consecutive calendar-year period ending on the above date. As used in this section the term "annual payroll" means the total amount of wages payable by an employer for employment during a year, regardless of the time of payment.

MESSAGES FROM THE SENATE

SENATE CHAMBER, Carson City, March 19, 1953.

To the Honorable the Assembly:

I have the honor to inform your honorable body that the Senate on this day passed Senate Bills Nos. 231 and 233.

Also, I have the honor to inform your honorable body that the Senate on this day refused to adopt the report of the Committee on Conference concerning Assembly Bill No. 260 and requests a third conference, and appointed Senators Lemaire, Whitacre and Orr as a Committee on Conference to meet with a like committee of the Senate for the further consideration of Assembly Bill No. 260.

G. W. FISHER,
Assistant Secretary of the Senate.

MOTIONS, RESOLUTIONS, AND NOTICES

Mr. Speaker instructed the Chief Clerk to read the following Report:

REPORT

The undersigned, appointed by the Speaker of the Forty-Sixth Session of the Assembly to make inquiries at the University of Nevada concerning conditions presently existing there between the Board of Regents and the president, between the president and the faculty, and between the faculty and student body, and in furtherance of the friendly relations existing between the University and the Legislature, begs leave to report that in the limited time available, inquiries have been made and hearings have been held as above directed at said University and reports as follows:

That the president of said University has, since assuming the duties of that office during the month of August 1952, inaugurated a number of changes in the administrative setup of the University including the discontinuance of the faculty committee system whereby certain policies had, until the discontinuance thereof, been formulated by the faculty members; also the number of faculty meetings have been greatly curtailed since August 1952; changes have also been effected in the admission requirements to some of the departments at the University without the complete approval of the faculty which had previously approved such changes. All of the above changes have apparently been effected with the knowledge and approval of the Board of Regents. The discontinuance of the extended committee system by the president has met with general faculty approval, allowing more time for instruction, research and student counseling. Relations between the president, deans and department heads and faculty seem generally good; however, there exists a small minority group among said faculty members, the identity of said members being known to the president and Board of Regents, and said minority group is dissatisfied with the president and his policies and feels that the president has been undiplomatic, harsh and disrespectful and has openly discussed the existence of this minority dissatisfied group within the faculty in an open faculty meeting held at the University on or about February 18, 1953, at which meeting the president announced that he expected to deal with the minority group within the faculty in the proper fashion. These statements, together with other statements made by the president at said meeting, have created within the minds of a few of the faculty members a feeling of insecurity due to the fact that they feel

that at any time on short notice they may be dismissed with little or no notice. This same minority group within the faculty has discussed their problems with other members of the faculty, alumni and generally with a number of acquaintances and local residents. It is the feeling of this committee that the above situation is not known to the general student body and that the morale of the student body is excellent. Your committee feels that the above situation existing within the faculty is entirely a personal problem, to be dealt with by the president and the Board of Regents, and that the Board of Regents are fully informed as to this situation. However, your committee feels that unless this faculty situation is alleviated the same could lead to a more serious situation and be reflected in a lowering of the general morale of the faculty.

Your committee has fully considered the advisability of the recommendation of the appointment of an interim committee to make further inquiries at the University during the interim of the next two years. However, it is felt that any such need which might exist only to advise the 1955 Legislature of conditions during the interim, could be met and fulfilled by the Legislative Counsel.

Respectfully submitted,

G. WILLIAM COULTHARD, *Chairman*.
F. E. WALTERS,
JAMES E. WOOD.

Mr. Coulthard moved that the report be accepted and that the report be printed.

Motion carried.

The Committee met with the Governor in his office and was in perfect agreement. The entire committee was present except one member of the Assembly who came in as we were breaking up. The Governor took notes as to what was agreed on. One of the Senators and I went to Russ McDonald's office to prepare the amendments. Before long a Senator who was not on the committee came into the office and asked me to leave, stating: 'this is going to be a private meeting of Senators.' Not five minutes after the door to Mr. McDonald's office had been closed in my face the Committee Senator approached me and asked me to sign the committee report, saying we *had not* concurred. I refused to do this because it would not be true."

Remarks by Messrs. Beko, Walters and Mount.

Motion carried.

Mr. Beko requested that the following remarks be recorded in the Journal.

"I desire that the record show that I strenuously object to the situation existing in this Legislature whereby certain individuals have managed to control most, if not all, of the legislation passing between the two houses. These self-appointed experts have taken it upon themselves to veto almost every piece of important legislation that has come out of this Chamber or because

it was contrary to the interests being served, or for reasons which are arbitrary and sometimes even ridiculous. It is indeed a pity to this State that this branch of the State Government is deprived of the opportunity of having these men actually elected to this body instead of serving in their present positions as political parasites although I am certain that all of us realize that it would be a brutal injustice to these men to ask them to file their candidacy for these offices and compel them to exist at the salary provided by law for the legislators. I am envious of these characters in that they are in a position to veto legislation even before the Assembly and Senate has had the opportunity to cast a final vote on the merits of the legislation, an advantage which even the Governor of this State does not enjoy. I direct these remarks in particular to two paid lobbyists, who have had the colossal gaul to suppress particular legislation in the Senate committees when a majority of the members of our Senate are in favor of that legislation. True, reflection is cast on the members of that body, not in allowing these characters to be heard, but in allowing them to exert a final control over legislation which even the members of that body do not have. I have asked that this statement be recorded so as to bring it to the attention of the voters of this State, that this situation does exist and that their constitutional right to be represented in Senate and Assembly has been usurped by these parasites who serve selfish interests without conscience or any sense of morality whatsoever.

"I consider this statement a small contribution in the effort to return the Legislative Branch of our State Government to the voters of this State as provided by our State Constitution and I feel that Assembly Bill No. 189 will help attain this end. The legitimate legislative representatives who openly perform a valuable service to this body as well as to their employers should willingly agree to register under the provisions of this Act for the protection of their own profession. If there is any doubt in the minds of the members of this body as to the identity of these obnoxious individuals, I will glady furnish their names."

Respectfully submitted,
CHARLES H. RUSSELL,
Governor.

Mr. Speaker appointed Messrs. Beko, Rowntree and Higgins as a committee to wait upon the Senate, and to inform that honorable body that the Assembly was now ready to adjourn *sine die.*

Mr. Speaker appointed Messrs. Swackhamer, Shuey and Walters to wait upon His Excellency, the Governor, and to inform him that the Assembly was now ready to adjourn *sine die.*

The committee appointed to wait upon His Excellency, the Governor, appeared before the bar of the Assembly, and reported that they had communicated with the Governor, and that he had no further communication to make to the Assembly.

The committee appointed to wait upon the Senate appeared before the bar of the Assembly, and reported that they had carried out the instructions of the Assembly.

A committee from the Senate consisting of Senators Settelmeyer, Seevers and Lattin appeared before the bar of the Assembly, and announced that the Senate was now ready to adjourn *sine die.*

Mr. Higgins made the following remarks:

"Mr. Speaker and Members of the Assembly: As the time for adjournment *sine die* has arrived it is only proper that some appropriate remarks be made concerning those who have so ably assisted us in our work during the 46th Session. I believe it only appropriate that we extend our thanks and offer our gratitude to the Chief Clerk and his staff and the other attachés and legislative employees; also to the Bill Drafter and his staff and the members of the various committees, without whom the legislative process could not operate. Their cooperation with the members of this body has been admirable and their work commendable. I believe also that we all owe the Speaker a vote of thanks for his ability and his courtesy extended to all. We have had our differences and our arguments, but in spite of all that, we can now go home assured that the democratic processes still work, and by so doing, insure to us all our freedom and our democracy."

Mr. Higgins moved that the Forty-Sixth Session of the Assembly of the Legislature of the State of Nevada adjourn *sine die.*

Motion carried unanimously.

Mr. Speaker declared the Assembly adjourned *sine die.*

Approved:

M. E. McCUISTION,
Speaker of the Assembly.

Attest: FRANK ROSASCHI,
Chief Clerk of the Assembly.
