SMALL BUSINESS IMPACT STATEMENT
(Nevada Revised Statutes 439.800-890)

Proposed Amendment of Nevada Administrative Code (NAC) 439
Administration of Public Health

Health and Safety of Patients at Certain Medical Facilities

PROPOSED ADDITION TO REGULATIONS for the Health and Safety of Patients at Certain Medical Facilities has been generated by the Bureau of Health Planning and Statistics (BHP&S).

Background:

When Assembly Bill 1 (AB1) was passed during the 2002 18th Special Legislative Session, mandatory reporting of sentinel events was incorporated into Nevada Revised Statute (NRS) 439.800-890. Mandatory reporting begins January 1, 2005. The State of Nevada Health Division is responsible for maintaining the Sentinel Events Registry (NRS 439.840), which will be done by the Bureau of Health Planning and Statistics. The adoption of this regulation is necessary to carry out the provisions of NRS 439.800-890, and the proposed amendment includes the following components: 1) the definition of reportable sentinel events; 2) the definition of the process for the mandatory reporting of sentinel events; and 3) the requirements for patient safety committees.

BHP&S has determined that the adoption of this regulation should not create an economic impact on medical facilities who are required to report sentinel events and who also qualify as small business as defined in Nevada Revised Statutes (NRS) 233B as a “business conducted for profit which employs fewer than 150 full-time or part-time employees”. This small business impact statement complies with the requirements of NRS 233B.0609.

1. A description of the manner in which comment was solicited from affected small businesses, a summary, and an explanation of the manner in which other interested parties may obtain a copy of the summary.

Provider comments were solicited during the draft proposal process by the Bureau of Health Planning and Statistics, and each qualifying provider received a Small Business Impact Questionnaire.

Copies of the summary of these questionnaires are available from the office of the Bureau of Health Planning and Statistics, 505 East King Street, Room 102, Carson City, Nevada 89701-4749. (775) 684-4218.
2. The estimated economic effect of the proposed regulation on the small business which it is to regulate including, without limitation, both adverse and beneficial effects.

The responses from the surveyed providers were unanimous that there should be no economic effects, adverse or beneficial, to their small business.

3. A description of the methods the agency considered to reduce the impact of the imposed regulation on small business and a statement regarding whether the agency actually used any of those methods.

BHP&S realized the best course to reduce the impact of the proposed regulation on small business was to involve the health care industry in the implementation of NRS 439.800-890. The Nevada Hospital Association and the State of Nevada Health Division have partnered, under the auspices of the Nevada Hospital Association, to form the Nevada Sentinel Events Registry Steering Committee and the Nevada Sentinel Events Registry Facility Work Group to address the mandatory reporting of sentinel events. They have been working diligently to meet the requirements set forth in AB 1.

4. The estimated cost to the agency for enforcement of proposed regulations.

The approximate cost to the agency is $150,000.

5. If the proposed regulation provides a new fee or increases an existing fee, the total annual amount the agency expects to collect and the manner in which the money will be used.

There is no fee or increased fee associated with the proposed regulation.

6. If the proposed regulation includes provisions which duplicate or are more stringent than federal, state or local standards regulating the same activity, an explanation of why such duplicative or more stringent provisions are necessary.

This regulation does not represent duplication on local, state or federal levels. The State of Nevada Health Division is responsible for generating regulations governing the mandatory reporting of sentinel events pursuant to NRS 439.840. There is no equivalent responsibility on the local or federal level.

Summary of Responses:

There were seven responses received from providers who qualified as a small business as defined in NRS 233B. All seven respondents replied “No” to all of the following questions:

1) Will the regulation have an adverse economic effect upon your business?, 2) Will the regulation have any beneficial effect on your business?, 3) Do you anticipate any indirect adverse effects upon your business?, and 4) Do you anticipate any indirect beneficial effects upon your business?.
